

Lions Thrill Crowd in Gymnastics Win

Weiss Captures All-Around, Leads State Over Scandinavian Gym Team

By PAUL LEVINE
Collegian Sports Editor

When a gymnast has confidence in a routine, it just naturally shows. Everyone, from the coaches to the judges, to the fans in the balcony can tell if a gymnast is sure of himself.

And last night in Rec Hall, Greg Weiss exuded a confidence the likes of which may never have been seen before. In the midst of the most difficult part of his parallel bars routine, Weiss casually waved to more than 7,300 hushed fans crammed into Rec Hall.

One Arm Handstand

So what, you say? Not much, except that at the time, Weiss was in the midst of a one-arm handstand. His left hand was planted firmly on the bar, as straight and rigid as the obelisk on the Mall. His right arm was extended perpendicular to his body, and with a casual flick of the wrist, Weiss said hello to all his friends.

The little wave didn't seem to bother the judges at all as they gave Weiss a 9.65 on the routine and the ex-Lion star went on to win the all-around competition with a score of 56.45, an average of 9.41 per event. In the process the former two-time NCAA all-around champion led Penn State to a 272.20-270.55 victory over the Scandinavian all stars.

"I just couldn't resist waving," Weiss said after the meet. "I knew that I had the routine made, and I've always wanted to do something crazy like that.

It would have served me right to have fallen off on my head."

But Weiss didn't fall, and neither did his teammates as the young Lion squad hit with remarkable consistency to upend the more-experienced Europeans.

Emery Second

Penn State junior Bob Emery finished second in the all-around, with a 54.95 total, an average of 9.16 per event. Emery's scores ranged from 8.80 on the parallel bars to 9.50 on the side horse, and he credits at least part of his success to Steve Cohen.

"After I did badly on the p-bars," Emery said, "I was sitting back in the corner." Steve came over and told me to calm down and think about the last routine, the high bar. It's good to know that somebody has confidence in you."

Since Emery came up with a 9.40 on the horizontal bar, it isn't hard to figure out why Cohen has some faith in him.

Cohen had already bounced himself out of the all-around competition when he fell off the side horse and his score plummeted to 7.35. The rest of his scores varied between 9.25 and 9.50 but it was only good enough for a fifth place finish in the all-around.

Denmark's Hans Peter Nielsen finished third in the all-around with a 54.60 total for the six events.

One of the pre-meet favorites in the competition, (Continued on page five)

DISPLAYING PRIZES they won at last night's Penn State-Scandinavia gymnastics meet are the top three finishers in the individual all-around competition. Greg Weiss (left), State's champion, raises the prize mug he earned scoring 56.45 points, an average of 9.41 per event. Bob Emery

(center), second place finisher, helped the Lions with 54.95 points. Scandinavian gymnast Hans Peter Nielsen (right) took third place with a 54.60 total. Weiss and Emery helped lift State to an exciting 272.20-270.55 victory.

Cloudy and cold today with snow developing by mid-day and continuing through most of Sunday. Accumulation may exceed six inches. Snow may be mixed with sleet and freezing rain at times. High today near 22, with temperatures remaining around 20 tonight and tomorrow.

News Roundup: From the State, Nation & World

The World

Four Soviet 'Intellectuals' Sentenced

MOSCOW — Four Soviet intellectuals active in Moscow's literary underground were convicted yesterday of anti-Soviet activities and sentenced to terms of up to seven years imprisonment.

Their five-day trial was closed to all but a half-dozen relatives and was unreported by Soviet news media. The mother of one defendant told waiting friends that all were found guilty as charged.

The defendants had served almost a year in a Moscow jail awaiting trial. Three of them are expected to be sent this weekend to Patma, a labor camp on the Volga notorious among Soviet liberal intellectuals. The fourth, sentenced to only one year, will be released Jan. 20, sources close to the defense said.

Friends of the defendants broke through a police line outside the courthouse after the trial to present red carnations to the four defense attorneys.

First Egyptian War Prisoners Released

TEL AVIV, Israel — A small contingent of Egyptian war prisoners crossed the Sinai Desert in a whipping sand storm for home yesterday, the first of 4,500 to be repatriated under terms of a general Israeli-Egyptian prisoner exchange.

The Egyptians will free nine Israeli soldiers and six civilians now being held in Cairo jails, the Red Cross said. Details of the exchange were sketchy because a news and photo blackout has been imposed by both countries.

But it was understood that a "small number" of Egyptians were taken from their prison camp near Haifa by bus across the desert to El Qantara on the Suez Canal, where they were handed over to Egyptian authorities about midday.

The operation is expected to be completed next week, probably Thursday.

The Nation

Committee Plans Further Hearings

WASHINGTON — Public hearings planned by the Senate Foreign Relations committee this year are likely to produce sharp new criticism of the Johnson administration's overseas policies.

The panel includes several of the leading Senate critics of the Vietnam war. They include the chairman, Sen. J. W. Fulbright, D-Ark., who said the goal of the inquiry would be "to try to develop as best we can what our policies ought to be."

One area expected to be explored will go to the heart of the Vietnam dispute between President Johnson and Fulbright. The chairman has expressed support for a proposal that the committee take a close look at the origins and nature of the Viet Cong and its political arm, the National Liberation Front.

The State

Hershey Cancels Speech

PHILADELPHIA — Lt. Gen. Lewis B. Hershey, selective Service director, has canceled a speaking engagement today in suburban St. Davids because of the threat of an antiwar demonstration.

Leaders of the proposed demonstration said they deplored Hershey's action and said the general missed an opportunity to open a constructive dialogue with those who opposed his conduct.

Hershey was scheduled to address the annual business meeting of the Valley Forge Council of Boy Scouts.

Hershey said the decision was the "first time" he had been forced to cancel a talk because of protesters. But he said, he had "a responsibility as a Boy Scout leader to see that scouting does not get involved in a controversy" unrelated to it. Hershey is a board member of a Boy Scouts' regional office.

Draft Violations Increase

Johnson To Plan Riot Measures

WASHINGTON (AP)—President Johnson will sit down with the nation's governors at the end of February for a discussion likely to focus on measures to prevent or curb organized racial street rioting next summer.

The preliminary agenda for an unusual Feb. 29-March 1 meeting of the National Governors' Conference in Washington reserves no time for discussion of Johnson's Vietnam war policies.

But the governors, with Republicans holding a 26-24 majority, are expected to grapple with the problem of providing funds for education, jobs and housing for ghetto areas despite the ever-mounting costs of the Asian conflict.

Interstate Riot Control

Democratic Gov. Otto Kerner of Illinois is expected to produce recommendations for interstate policing of riots from a conference committee on the National Guard.

This may deal mainly with halting demonstrations after they have started. But as chairman of the President's National Advisory Commission on Civil Disorders, Kerner is expected to urge support for recommendations the commission is expected to make to head off big-city outbreaks.

The Illinois governor told a news conference Wednesday that the commission's report is "going to be uncomfortable for the people of the United States."

Former Vice President Richard M. Nixon, a potential candidate for the Republican presidential nomination, and Gov. George Romney of Michigan, an announced candidate, have predicted separately that the nation may face planned-in advance street warfare next summer.

In recognition of this threat, Democratic National Chairman John M. Bailey said yesterday the President and his party will stress law and order as a major campaign issue in the presidential race.

'Stew of Bigotry'

Bailey said some Republicans he did not name plan to "stir the stew of bigotry" in the campaign.

He expressed his views in a speech prepared for a Rocky Mountain Democratic rally in Salt Lake City, Utah.

"We are not going to let them get away with it," Bailey said. "President Johnson and the Democrats in Congress are going to make clear that in this nation we make changes with the ballot, not bombs."

The governors' conference, headed by GOP Gov. John A. Volpe, who is running as a fa-

vorite-son candidate for the party presidential nomination in Massachusetts, scheduled a three-hour meeting at the White House the morning of Feb. 29. It will be followed by a luncheon which Johnson may attend. The governors and their wives will be White House dinner guests that night.

The conference will hear reports from 11 committees.

Gov. Nelson A. Rockefeller of New York will have a report on health and welfare, while Democratic Gov. Calvin L. Rampton of Utah will report on education and Democratic Gov. Philip H. Hoff of Vermont on taxation.

LYNDON B. JOHNSON

Report Shows New Record In Card Burning, Dodging

SAN ANTONIO, Tex. (AP) — President Johnson leaped through a report yesterday that showed draft card burnings and other Selective Service law violations jumped 77 per cent in 1967 to a 20-year peak. There were 952 convictions.

The report also said riots and other extremist activities have put a severe strain on the Justice Department's intelligence efforts. Plans are under way to enlist the help of computers and the FBI and the strain may result in a bid for more legislation.

Atty. Gen. Ramsey Clark left the report when he conferred

with the President Thursday on the Justice Department's budget.

White House press secretary George Christian said Johnson was going through this and other papers at the LBJ Ranch yesterday as well as the State of the Union message he delivers to Congress Wednesday night.

Humphrey Report

A detailed report from Vice President Hubert H. Humphrey on his nine-nation African tour came to the President. Christian said Johnson told him it had a number of constructive suggestions. There was no elaboration on that, or on word that the President believes the mission of U.S. Ambassador Chester Bowles to Cambodia was useful.

Bowles went to Cambodia from his diplomatic post in India to discuss the problem of Vietnamese Communists' use of Cambodia as a refuge.

Christian had two announcements:

Chancellor Josef Klaus of Austria has accepted a presidential invitation to pay an of-

ficial visit to Washington April 10-11.

Dr. Edward D. Re, chairman of the Foreign Claims Settlement Commission, will be nominated assistant secretary of state for educational and cultural affairs.

Law Authority

An authority on international law and diplomacy, Re is a 47-year-old native of Marina, Italy. His new job pays \$27,000. He will replace Charles Frankel, who resigned and voiced displeasure with Johnson's Vietnam policy.

Clark's report on crime control activities listed a record 668 indictments handled by the department's organized crime and racketeering section in 1967.

A record 57 school desegregation cases were filed, along with 53 public accommodation cases—the latter up from 34 in 1966. Eight employment discrimination cases were filed. New antitrust cases totaled 54.

All told, the Justice Department took 34,512 criminal cases to court last year, an increase of 2,587 over 1966 and the largest total in more than a decade.

Flu Epidemic Near?

Ritenour Active

By BILL STRENN

Collegian Staff Reporter

The number of illness cases at the Ritenour Health Center has shown a gradual rise during the week. Dr. Albert L. Ingram, Ritenour director, said today.

Ingram said that the number of cases of illness in Ritenour continues to be above the number of this time last year, but the illnesses "are nothing to cause alarm."

He said that few cases of influenza-type illness have been seen.

The flu has a several major eastern cities in epidemic proportion. School absenteeism has been high.

Infections

Ingram reported that most of the Ritenour cases involve a diffuse upper respiratory infection, with sore throat and fever. He said that there were 54

students in the hospital yesterday, compared to 49 Thursday and 37 Wednesday.

Thursday, Ingram announced that student visiting hours at Ritenour were being suspended, due to the increased number of patients.

He urged students to get proper rest as a preventative measure against illness, and to report to Ritenour at the first sign of illness.

Restrictions at CCH

Meanwhile, the Centre County Hospital, in Bellefonte, yesterday placed restrictions on visiting hours.

"The curtailment of hospital visitation is a precautionary measure in view of the current influenza epidemic," Robert C. Kurtz, administrator, said in a statement.

Kurtz requested that family members with symptoms of colds or illnesses refrain from visiting the hospital.

Warhead Canceled

Pentagon Drops Program

WASHINGTON (AP) — The Pentagon canceled yesterday a \$175-million program that would have provided a big new nuclear warhead for the nation's land-based strategic missiles.

Defense Department sources said the program's cancellation re-emphasized the current trend toward developing multiple warheads which can be carried aloft by one missile, then directed individually at widely separated targets.

The department said it has informed members of Congress that development work on the Mark 17 re-entry vehicle, or warhead, has been terminated after \$45 million in expenditures.

Funds originally earmarked for Mark 17 work will go instead into the Mark 11 single warhead programs.

The Mark 11 warheads go atop the Air Force's Minuteman, an ICBM targeted against points in Soviet Russia and Communist China.

Other re-entry systems soon will give the later Minuteman

3 missiles multiple warheads packages.

The Pentagon was extremely cautious in discussing the matter after issuing a three-paragraph statement of the cancellation.

The statement said AVCO Corp. of Wilmington, Mass., had received a contract for research, development and production of the Mark 17 in April 1966. Had the warhead gone into production, the program would have involved the spending of \$175 million through June 1970.

But, the Pentagon said, the entire re-entry vehicle requirements for Minuteman missiles were re-evaluated recently and it was decided to cancel the Mark 17 before additional research and development or heavy production costs were incurred.

Two Men Arrested For PSU Bomb Threats

Two men have been charged with involvement in Fall Term campus bomb scares, it was learned last night. Phillip Turco, a student at the University last term, and William Linder, of North Wales, were arrested Thursday at Schwenksville. They were freed on \$3,000 bail, pending arraignment in Centre County Court, according to the Associated Press.

Local state police, however, reported that as of early yesterday Linder had failed to post bond.

The men were arrested in connection with anonymous threats received at Willard Building the morning of Nov. 2, 1967. They have been charged with providing false information about a bomb, and conspiracy to commit an unlawful act.

Turco, a former chemistry major from Ambler, and Linder were taken into custody following extensive investigation by State Police and University Security officials.

Review of the Week

The first week of Winter Term opened with the biggest news coming from the University Senate.

On Tuesday, the Senate met to approve a long pushed for pass-fail grading system, and Ernest C. Pollard, head of the biophysics department, suggested suspending student demonstrators who "disrupt the operation of the University" in their protest actions.

The pass-fail grading system, effective Fall Term, will allow all students to schedule a minimum of nine credits and a maximum of 18 credits towards graduation requirements. Students will be permitted to take pass-fail grades in elective subjects, but, if departmental policy permits, students may take required courses under the pass-fail system, too.

Also included in the new system, which ends a year-long push by various campus organizations, is the option to switch from pass-fail grades to the usual numerical average system during the drop-add period at the beginning of each term. Students can schedule all courses on a regular grading system if they find pass-fail grading unsuitable.

In his comments to the Senate, Pollard said "something of crucial value has been lost" when students will not listen to speakers defending the Johnson Administration's policy in Vietnam, but will listen attentively to Timothy Leary, LSD apostle. He added that local police action to control unruly action by demonstrators is not adequate and that the "stronger deterrent," the threat of suspension, is necessary instead.

Pollard will speak before the next Young Americans for Freedom meeting at 7:30 p.m., Wednesday in 213 Hetzel Union Building. He'll follow up his views on student protest and will lead a discussion afterwards.

Although the pass-fail grading system will be an addition to the academic system, President Eric A. Walker said that the quarterly term system will stay in effect. President Eric A. Walker told residents in North Halls that the ten week term, four terms per year at the University, will stay in effect. The University switched from the semester system to the quarterly system in 1963.

Walker also spoke on the University's current financial situation. On Thursday Gov. Raymond P. Shafer signed a \$48.5 million appropriation bill for the University. The University had had to borrow per month for the last four months to meet operating expenses and faces mounting interest payments on the loans. In December, the University had considered the possibility of a tuition hike, but Walker has since announced that there will be no raise in tuition rates.

The University President also expressed concern

about the "overly middle-class nature of the student population. We were established to teach practical things to the disadvantaged. It hasn't turned out that way, and this is unfortunate. I think we've lost our character," he said. He explained that the University can't admit disadvantaged students because there would be a "discrimination" factor in seeking them out through admissions policies.

The Undergraduate Student Government started the term with an attack on campus apathy by USG President Jeff Long and closed the week with praise for the University Senate's approval of the pass-fail grading system and with the establishment of a financial aid fund for students under care at the Ritenour Health Center.

Steven Gerson, USG Administrative Action Commission chairman, said Thursday that students unable to afford the \$10 a day bed charge can apply for financial assistance to the University Health Association. Gerson said that USG will still continue to work on a solution to the strongly criticized bed fees, but added that USG has not received substantial complaints concerning medical services at Ritenour.

The Interfraternity Council began the term on a good financial note as the Fraternity Purchasing Association collected \$40,000 Thursday night from member fraternities for bills the FPA incurs in March. The FPA is a fraternity co-operative which buys house supplies at a discount for its 43 member houses at the University.

Meanwhile, fraternity rush programs began Monday night with more than 650 men registered. IFC says it aims to double the 400 man pledge figures of last term.

Froth, the campus humor magazine, didn't begin the term with as big a start as other organizations.

Anthony Podlecki, Froth advisor, resigned this week stopping publication of the magazine until a new faculty adviser is selected by the Froth board of directors. According to reports, Podlecki had not been satisfied with subject matter in recent issues of the magazine. Froth had planned to go to press in approximately 10 days.

And, the miscellaneous note of the week includes a University development of fruit-flavored honey to give a "shot in the arm" to the entire honey industry. Colleagues of Robert Berthold, Jr., developer of the flavored honey, are reportedly sorry to see Berthold complete his work.

"Before our field trials began," the graduate student explained, "we used all the secretaries in our building, as well as staff members we could corner, as taste-testers. Honey and crackers were a part of all the coffee breaks."

And, the Young Americans for Freedom is now the largest chapter in the state, according to Doug Cooper, chapter chairman. "Our being number one in the state is a tribute to the many members who helped attract new people to the libertarian-conservative movement," announced Cooper.

BERRY'S WORLD

"Now, let's get with it—there must be lots of ways to spend money that no one has even thought of yet!"

Letter to the Editor

More On Dewar

TO THE EDITOR: I should hope that Robert Dewar's highly emotional sentiments against the anti-war protesters are not typical of those who support the Administration's Vietnam policy. With extremism and overemotionalism within the peace movement tarnishing the efforts of some of us in bringing about further dialogue on the Vietnam question, it is comforting to know from reading Mr. Dewar's letter that this is not a problem occurring only within our movement. Mr. Dewar's seeming support of a Vietnam veteran's throwing a pitcher of beer on a group of peace demonstrators in front of a Detroit bar makes me feel that if he were within our movement, he would probably support those who burn flags or charge the Pentagon.

Most of us in the peace movement are moderates who share the good company of some of our most articulate Congressmen and legislators as well as noted military people such as Marine General Shoup. The reason that some of our dissent has had to take to the streets is the tremendous lack of meaningful dialogue taking place on the war. Aside from emotional tirades against the few in the peace movement who desecrate the flag or obstruct draft centers, all we seem to hear are endlessly repeated generalities about why we are in this war.

If men like Secretary of State Rusk would agree to appear before the Foreign Relations Committee and have it televised; if professors and ROTC people and you veterans would start flooding the Collegian with letters on why you support this war, then maybe some meaningful dialogue could begin in the papers and on debating platforms rather than in the streets.

So Hawks Rise! Many of us would like to hear what you have to say, or is the oft heard contention true that one either opposes this war or apathetically goes along with "whatever the government thinks is best" and has made little concrete study of the issues involved.

Philip N. Klopp '69

Letters to the Editor

Pollard Rebuttal

TO THE EDITOR: I would like to reply to the remarks about me in the January 10 Collegian by Mr. Serrill. To me the most telling thing is that in order to make a case against me, he needed to alter my actual statements. Here are some corrections.

I did not call for a voice vote in the Senate; there was no "icy silence."

I gave no broad definition of "disruption," but I explicitly excluded all forms of protest which are covered by the First Amendment. Freedom of speech is one such freedom and certainly I never, no never, advocated that anyone who "opened his mouth in opposition to the Vietnam War would be eligible for suspension." Instead, I advocated the institution of debates to allow much of this to happen. I am delighted that USG has started the process of organizing such debates. In my view demonstrations are not intended to cause disruption. If they are large, they are made with police permission in advance. Permission to prevent an invited speaker from speaking on our campus would not be given.

My remarks to the Senate were not primarily concerned with Vietnam. At City College disruption occurred because of student opposition to a building construction. The closest thing to disruption at Penn State occurred because of a question regarding the House Un-American Activities Committee.

Under questioning in my office after the Senate meeting, I gave Mr. Serrill some of my views regarding the Vietnam War. I asked him not to use them as I disliked being publicized on an extemporaneous discussion. I do have to say that if "staying out of politics" means that I cannot discuss political matters in my own room, then surely I am not one who is stifling expression. I think one should look carefully at an editorial writer who says I don't have that freedom.

Head and Professor of Biophysics
Ernest C. Pollard

Disruption and Education

TO THE EDITOR: Regarding Mr. Serrill's column concerning Dr. Pollard's recent Senate speech, I find it rather alarming to note his definition of a demonstration as an intention to disrupt. I want my education and I want it very badly. It is my right to have it and anyone who interferes with it in the way education was disrupted at Harvard, is clearly not a responsible dissenter, since he does nothing whatever to prejudice me in favor of what he might have to say.

It would seem that a responsible dissenter ought to be able to make his views known to me in such a way as to avoid disrupting such an important aspect of my life as my education.

Further, it was very amusing to see Mr. Serrill state that the Harvard demonstrations served to stimulate debate concerning the war. The only debate I have seen stimulated concerned whether such demonstrations ought to be allowed to continue.

Alan Train '68

Practical Advice, Please

TO THE EDITOR: USG President Jeff Long's statement, "this campus is dead," has the effect of saying, fellow student, you are a deadhead.

Obviously designed to arouse student interest in campus and national affairs and to stamp out apathy, it states that just going to classes and studying is not enough. In order to change or improve everyday life on campus, we must become active and involved in student affairs and national politics. Almost all of us would come to this conclusion after reading Mr. Long's statement.

What can I do? A practical reply would be desirable, Mr. Long.

Gene (Deadhead) Hendrickson '71

LETTER POLICY

The Daily Collegian accepts letters to the editor regarding Collegian news coverage or editorial policy and campus or rec-campus affairs. Letters must be typewritten, no more than two pages in length, and should be brought to the office of The Daily Collegian in person so that identification of the writer can be checked. If letters are received by mail, The Collegian will contact the signer for verification. The Daily Collegian reserves the right to select which letters will be published and to edit letters for style and content.

Engineers, Mathematicians:

you should consider a career with NSA

... if you are stimulated by the prospect of undertaking truly significant assignments in your field, working in its most advanced regions.

... if you are attracted by the opportunity to contribute directly and importantly to the security of our nation.

... if you want to share optimum facilities and equipment, including one of the world's foremost computer/EDP installations, in your quest for a stimulating and satisfying career.

The National Security Agency is responsible for designing and developing "secure" communications systems and EDP devices to transmit, receive and process vital information. The mission encompasses many aspects of communications, computer (hardware and software) technology, and information recording and storage ... and provides a wealth of career opportunities to the graduate engineer and mathematician.

ENGINEERS will find work which is performed nowhere else ... devices and systems are constantly being developed which are in advance of any outside the Agency. As an Agency engineer, you will carry out research, design, development, testing and evaluation of sophisticated, large-scale cryptocommunications and EDP systems. You may also participate in

related studies of electromagnetic propagation, upper atmosphere phenomena, and solid state devices using the latest equipment for advanced research within NSA's fully instrumented laboratories.

MATHEMATICIANS define, formulate and solve complex communications-related problems. Statistical mathematics, matrix algebra, and combinatorial analysis are but a few of the tools applied by Agency mathematicians. Opportunities for contributions in computer sciences and theoretical research are also offered.

Continuing your Education? NSA's graduate study program may permit you to pursue two semesters of full-time graduate study at full salary. Nearly all academic costs are borne by NSA, whose proximity to seven universities is an additional asset.

Salaries and Benefits Starting salaries, depending on education and experience, range from \$8,000 to \$13,500, and increases follow as you assume additional responsibility. Policies relating to vacations, insurance and retirement are liberal, and you enjoy the advantages of Federal employment without Civil Service certification.

Another benefit is the NSA location, between Washington and Baltimore,

which permits your choice of city, suburban or country living and allows easy access to the Chesapeake Bay, ocean beaches, and other summer and winter recreation areas.

Campus Interview Dates:
January 22

Check with the Placement Office now to arrange an interview with NSA representatives on campus. The Placement Office has additional information about NSA, or you may write: Chief, College Relations Branch, National Security Agency, Ft. George G. Meade, Maryland 20755, ATTN: M321. An equal opportunity employer, M&F.

Computer Meeting Set

The Central Pennsylvania Chapter of the Association for Computing Machinery will hold its first meeting at 7:30 p.m. Tuesday in 109 McAllister Bldg.

Speaker for the meeting will be Ronan B. Banarji, who will talk on "Artificial Intelligence Research at Case Reserve University."

The public has been invited to attend.

Construction of the Life Sciences Building, Unit II, has been started south of Frear Laboratory.

The five-floor building, a \$3 million project, is being underwritten by the General State Authority. Completion date has been set at Sept. 18, 1969.

According to University spokesmen, 30 parking spaces have been lost to the project

along the northern edge of Parking Area Yellow H.

Farms Bought

The University has purchased the farm of William J. and Rachael A. Parsons, west of Pine Grove Mills, increasing to more than 1,500 acres the land that composes the Agricultural Research Center at Rock Springs.

The new tract, comprising 17+ acres, is located between the S. Maude Fry farm purchased last year and the Maude E. Miller farm purchased in 1965.

The Parsons land, along with other land owned by the University in that area, will be used by the College of Agriculture for research in the field of plant sciences.

Final plans for an addition to the student union building at the McKeesport Campus have been approved by the University Board of Trustees.

The extension to the Buck Union Building will nearly double the student area now in use.

Construction is expected to begin sometime early this year, after bids have been requested and contracts awarded.

The University's Administrative Committee on Student Affairs has granted a charter to The Highacres Collegian, student newspaper at the Hazleton Campus.

Conference Set
The 36th annual Turfgrass Conference at the University, attracting nearly 500 turfmen each year, will be held Monday

through Thursday next week at the J. Orvis Keller Conference Center.

Delegates will be welcomed Monday in a brief address at 2:00 p.m. by Eric A. Walker, University president.

A report of a Pennsylvania turfgrass survey will follow, presented by H. Burton Musser, professor emeritus of agronomy and former head of the University's turfgrass program.

The University is one of ten colleges and universities throughout the United States to share in National Science Foundation grants of \$812,550 for the support of Academic Year Institutes for college science and mathematics teachers.

The Foundation has allocated \$132,750 for the 1968-69 Penn State Institute for teachers of engineering.

ARTIST'S DRAWING OF ZETA PSI FRATERNITY'S NEW HOUSE, soon to be constructed at 225 E. Foster Ave.

Talks Offered Next Week

John W. Saunders Jr., professor of biology at the State University of New York at Albany, will continue the 1967-68 Biological Science Lecture Series Program at the University with a discussion of "Morphogenetic Cell Death" at 4 p.m. Thursday in 105 Forum. Open to the public, the program is sponsored jointly by the Colleges of Science and Agriculture.

Saunders' research has analyzed factors controlling the development of limb buds and feather tracts in bird embryos. He recently discovered the effects on molding of form, which result from specific regions of cell death during the embryological developmental program.

F. D. Greene, professor of organic chemistry at the Massachusetts Institute of Technology, will speak on "Diastereoisomers" before the University Chemistry Colloquium at 12:45 p.m. Thursday in 810 Whitmore Laboratory.

A specialist in the mechanisms of organic reactions, Green holds a bachelor of arts degree from Amherst College, and both master of arts and doctor of philosophy degrees from Harvard University.

He has served on the M.I.T. faculty since 1953, was editor of the Journal of Organic Chemistry in 1962, and is a member of the American and British Chemical Societies. The lecture will be open to the public.

Job Corps Director To Visit

CHD To Honor Kelley

Distinguished guests will attend the Second Annual Convocation of the College of Human Development at the University when William P. Kelly, director of the Job Corps, Office of Economic Opportunity, will be honored for his outstanding accomplishments with underprivileged youth.

The event, scheduled 8 p.m. Tuesday in the Hetzel Union Building Ballroom, is open to the public.

Kelly will give the main address on "College Students and the Other War (the war on poverty) in which he will discuss his experiences with "poor" youth and how college students can help with Job Corps work.

Among convocation guests will be William Mullins, special assistant to Sargeant Shriver, director of the Office of Economic Opportunity, who will represent Shriver in bringing messages of congratulation; and top executives of approximately 15 private industries that sponsor Job Corps Centers throughout the country.

Executives To Attend

The industrialists, who also will honor Kelly at a dinner preceding the convocation, are presidents, vice presidents, and other executives from these companies: Graflex Incorporated, Burroughs Corporation, Avco Corporation, International Telephone and Telegraph, Brunswick Corporation, General Electric Corporation, Northern Systems Company, RCA Service Corporation, Xerox, and others.

Warren W. Watson, a freshman from Mechanicsville, convocation co-chairman, will serve as master of ceremonies. The convocation is sponsored by all student organizations in the College of Human Development, coordinated by the College's Student Council.

In addition to Kelly's address, features of the program will be presentation of the first annual "Distinguished Service to Youth Award" to Kelly from the College of Human Development Student Council by Miss Elizabeth Gaumer, Student Council president; choral selections by 17 members of the girls' choral group from the Keystone Job Corps Center at Drums, Pa.; presentation of a plaque to Kelly by Patricia Carter, of the Keystone Center, in behalf of American youth who have been helped by the Job Corps.

Ford to Welcome

Dean Donald H. Ford, of the College of Human Development, will welcome the visitors, emphasizing the close accord of the College with Job Corps aims.

Among other guests will be new members of the Human Development faculty and their wives; J.R. Corcoran, director of the Keystone Job Corps Center, and five youths from the Blue Jay Job Corps Center at Marienville, Pa. Kelly will be introduced by David Gottlieb, professor of human development, who worked with Kelly for two years as assistant Job Corps director.

LSA Circulates Anti-War Petition

The Lutheran Student Association is circulating on campus a "We Won't Go!" petition on the Vietnamese conflict. Signers pledge to not "participate" in the fighting in Vietnam, or in the military of the United States as long as the present war continues.

According to LSA President, Daryl Zeigler, the petition is part of a national campaign of the Lutheran Action Committee, a national organization of young Lutherans.

The LAC said it plans to use the "We Won't Go!" petition as the basis for organizing all members of the Lu-

theran Church "opposed to the war in Vietnam and who refuse to participate in military service while the war continues." The group also said it plans to bring attention to the "growing disaffection" among Lutherans "with regard not only to the war and military service but also to the silence or compromise displayed on these issues by clergy, laity, and the officials

themselves."

Zeigler said the petition has not been adopted by the local LSA, but it is being circulated by request of the national organization. The explained that the LSA is involved in "intensive study of the Vietnamese situation." The LSA will also include nine Vietnam study projects in preparation for a statement this term, he added.

War 'Kept Out' of Cambodia

Bowles Says Vietnam War Contained

NEW DELHI, India (AP) — U.S. Ambassador Chester Bowles returned yesterday from his five-day mission to Phnom Penh and said his talks with Prince Norodom Sihanouk made "an important step" toward preventing the Vietnam war from spreading to neutral Cambodia.

"We said we have no intention of crossing the border under any circumstances," Bowles told newsmen. "The question of hot pursuit did not come up."

He referred to the possibility that U.S. forces might enter Cambodia in hot pursuit of Viet Cong and North Vietnamese troops using

Cambodia's border areas as a sanctuary.

"The whole issue was how we could work and cooperate together to prevent Cambodia's neutrality from being infringed upon by anybody," Bowles said.

A joint communique expressed U.S. respect for Cambodia's "sovereignty and territorial integrity" but contained no specific guarantee that U.S. forces would not cross the border in pursuit of Communist forces. In Washington, experts on the situation noted the communique's wording left open the option of hot pursuit.

Bowles said Cambodia

seeks "a stronger and better equipped" International Control Commission — ICC — to help safeguard her neutrality, a move the Soviet Union acted promptly to oppose.

The joint communique stressed that Sihanouk wanted all the belligerents in Vietnam to respect his country's territory and said both the United States and Cambodia desired a beefed-up ICC to patrol the jungled border area against violations.

The ICC was established by the 1954 Geneva conference that ended the French presence in Indochina. Its members are India, Poland and Canada.

Cambodian sources said Soviet Ambassador Sergei Koudriavtsev and M. Mylicki, head of the Polish delegation to the ICC, promptly called on Sihanouk to express opposition to the U.S. offer of two helicopters to assist the commission in border surveillance. The action was seen as an attempt to head off any agreement Bowles and Sihanouk might have made to have the ICC restrict the use of Cambodian territory by the Vietnamese Communists.

Bowles was dispatched to Phnom Penh by President Johnson after Sihanouk said he would welcome a presi-

dential envoy to discuss problems involving the Vietnam war, including the use of Cambodia by Communist troops fighting in Vietnam.

Sihanouk was reported by an authoritative U.S. source to have acknowledged to Bowles the presence of Viet Cong and North Vietnamese forces on Cambodian territory. Sihanouk was said to be concerned about this and determined to prevent violations of Cambodia's borders by any foreign forces.

Bowles was said to feel that Sihanouk has made a new assessment of the situation regarding Communist encroachments.

After graduation, what? Will you begin your career as an engineer or scientist or return to school for an advanced degree?

You can do both at NOL

If you are an engineer in the top third of your class or a scientist in the top quarter of your class, NOL offers you the opportunity to begin your career in one of the world's great laboratories and, at the same time, go ahead with your plans for graduate study.

NOL is a laboratory in the true meaning of the word, and one of the largest and best-equipped laboratories in the world. It is the nation's leading R&D establishment for Anti-Submarine Warfare (ASW), the Navy's principal high speed aeroballistics activity, and a leader in the development of new air and surface weapons. The spectrum of research at NOL ranges from nuclear effects to acoustics to explosives and materials. At NOL, weapons development is carried through from inception to design to prototype test and development. Since 1950, NOL has completed 209 new weapons and devices such as SUBROC, nuclear depth bombs, mines, projectile fuzes, underwater detection systems, and components and design data for POLARIS, TARTAR, TALOS, TERRIER, ATLAS and TITAN missiles. A civilian staff of over 3,000 people includes more than 1,000 professional engineers and scientists—experts with national and international reputations. Extensive and unique facilities embrace wind tunnels operating to Mach 17, hypervelocity ballistic ranges, the world's most exceptional hydroballistic facility, shock tunnels, 300g centrifuge ... multi-million-dollar experimental facilities.

Here is your opportunity. Each year, NOL interviews outstanding engineering and science graduating students. Selects the handful that seems to be really creative. Takes them to its beautiful 875-acre "campus" (the front yard is a golf course) in the rolling hills of Maryland near the Nation's Capital. Puts them through an optional one-year professional development course with rotational assignments to various areas within the Laboratory to prepare them for permanent assignments.

From the very beginning, new staff members have an opportunity to contribute directly to significant projects ... to be part of an organization where groups are small and emphasis is on the individual.

NOL offers you a graduate study program that is one of the largest and most productive programs in the country. Each year members of our professional staff receive M.S.'s or Ph.D.'s through this program. NOL has a significant advantage in its proximity to the University of Maryland. Many NOL staff members hold permanent part-time positions on the Maryland faculty, and graduate level courses are taught at NOL every semester. Maryland also offers many courses on its own campus—only minutes away—at times which are convenient to and keyed to the special requirements of NOL.

site systems, instrumentation for weapons evaluation and aeroballistics research, and performance of new concept feasibility experiments.

Chemical Engineers and Chemists—for research and development pertaining to high-energy propellants and explosives; high polymers; molecular and crystal structures; electrochemistry; high-temperature, high-pressure chemical equilibrium studies; and the thermodynamics of high-energy reactions.

Engineering Physicists and Physicists—theoretical and experimental research in a wide range of areas including signal processing, infrared radiation, acoustics, magnetic and semi-conductive materials, and detonation physics; plus weapon systems development and studies.

NOL ACADEMIC STUDY PROGRAMS

PROGRAM	COMPETITION	ADMITTANCE	SUPPORT
Part-time Graduate Study	Open to all qualified employees.	Approval by line management.	Refund of tuition and fees if course grade is "B" or better ... approx. 1/2 time plus travel time for attendance.
Graduate Work-Study	Recent college graduates in certain engineering & scientific fields.	Selected by Personnel Officer ... admission to local graduate school for M.S.	Full salary, tuition, books & fees ... 2 days each week devoted to study and classes for 2 years maximum.
Intermediate Graduate Study	Recent college graduates in certain engineering & scientific fields.	Selected by Personnel Officer ... admission to graduate school ... an honors program.	Full tuition, books, fees, travel per diem & 1/2 GS-7 salary ... (over \$3800) ... 2 semesters full-time.
Advanced Graduate Study	Scientists & Engineers, grade GS-11 and above.	Selected by NOL Training Committee.	Full tuition, books, fees, travel, per diem, & full salary for 2 semesters.

NOL NEEDS:

Aerospace Engineers or Hydrodynamicists—design studies of high-speed, high-performance re-entry systems, basic problems in theoretical and experimental aerothermodynamics, aeroballistics and hydroballistics; and aerodynamic design and development of hypervelocity wind tunnels and ballistic ranges.

Mechanical Engineers—conceptual design and development of warhead safing, arming and target-detecting devices for tactical and strategic missiles, underwater weapons, vehicle structures, and mechanical or electromechanical time and motion-sensing mechanisms.

Electronic Engineers—design, development and evaluation of underwater communications and detection systems, weapons guidance systems, influence fuzing, air-borne mis-

WHITE OAK, MARYLAND

Grapplers, Gymnasts Test Springfield

Wettstone Readies Squad For Second Meet In Row

By DAVID NEVINS

Collegian Sports Writer
Yesterday's gymnastics meet against an impressive Scandinavian team will undoubtedly be remembered as the most outstanding home meet of this or possibly any season. Unfortunately for four Penn State gymnasts, the second outstanding home meet of the season will occur tonight against Springfield University.

Springfield should offer the Lions some serious competition, especially since four of State's best gymnasts will have to compete in two meets in a span of 24 hours. The physical condition of Bob Emery, Joe Litow, Dick Sweetman and John Kindon could very well decide the meet.

The side horse and the high bar will be the two events most affected by performing two successive nights. Both of these events are extremely easy to fall off of, and the high bar is

especially grueling on the hands.

Just about all the events in a meet necessitate the use of the hands in some manner, putting tremendous stress upon them throughout the entire meet. By the time the night is over many gymnasts may have difficulty merely opening and closing their hands.

Fortunately for the Lions the high bar is probably one of their strongest events, so even with the extra strain State should still win hands down.

The all-around performer for the Springfield meet has not yet been decided, but will be the man who scores the highest total in Friday's meet. Should Emery gain the honors, Lion fans will not have to wait long to see how his injured knee will hold up.

If He Can Get Through
"If I can get through the long-horse and free exercise without hurting my leg I think I'll be alright," said Emery. "The other events really shouldn't put very much strain at all upon my knee."

Penn State alumnus and two-time NCAA all-around champ Steve Cohen has already seen Springfield perform this season and thinks the Lions should have no trouble winning.

"The final score for Penn State will be less due to the Scandinavian meet the night before, but we should still win without any trouble," said Cohen. "This year's team has an unbelievable amount of potential, but they are young and still have to prove themselves. If they all click in one meet, and this meet happens to be the nationals, they could conceivably win."

RICH LORENZO
... Wrestling Captain

Wrestlers Go For First Win; Freshmen Won't Participate

Judgement Day has yet to arrive for Bill Koll and his Nittany Lion wrestlers. Yesterday, Athletic Director Ernest B. McCoy informed Koll that the status of his freshmen wrestlers would be decided by an administrative board in the future, and gave no indication as to what the decision might be.

The decision is not expected until after the Springfield match, so this afternoon the Lion grapplers will be all upperclassmen. The highlight of the 2 p.m. meet at Rec Hall will be the meeting of unbeaten Joe Porrell (5-0-1) and State's Wally Clark at 130 pounds. Porrell will have his hands full with Clark, who lost his only match to national champ Doug McGuire of Oklahoma by one point.

Fielding the Best

Koll has thus had his maneuverability hindered for the Springfield match, but is "concentrating on fielding the best possible team."

Hopes had been raised earlier in the week that Clyde Frantz, a freshman and two-time, 138-pound state champion, might to an NCAA ruling earlier in the week, which would permit freshmen to participate in certain varsity sports. This possibility for Penn State frosh is now in the hands of the administration.

Doug Porter, Springfield mentor, brings a fine 13-year coaching mark of 121-27-3 to Barges (2-4) in the 177 pound class and Larry Rec Hall with his Maroon squad, which has posted a 3-3 mark thus far. The three losses

have been to top notch Eastern schools Navy, Lock Haven and East Stroudsburg, while the wins have been over New England schools, RPI, C. W. Post and Wilkes.

The other featured event will have Lion captain Rich Lorenzo, unbeaten in one match, tangle with Springfield's John Glascock, who posts a 4-2 mark at 191 pounds and has the second best record on the squad.

Other pairings will be Harry Weinheffer (0-1) against Jim Mathias (0-0) at 123 pounds, Dave Spinda (0-1) at 130 facing Cam Sinto an NCAA ruling earlier in the week, which would permit freshmen to participate in certain varsity sports. This possibility for Penn State frosh is now in the hands of the administration.

Matt Kline (1-0) faces Bill Sidoti (0-0) at 167, Bob Funk (1-0) squares off against Bill Barges (2-4) in the 177 pound class and Larry Rec Hall with his Maroon squad, which has posted a 3-3 mark thus far. The three losses

the heavyweight bracket.

OPEN HOUSE

Sunday, January 14

2-5 p.m.

On Campus with Max Shulman
(By the author of "Rally Round the Flag, Boys!", "Dobie Gillis," etc.)

1968: ITS CAUSE AND CURE

Are you still writing "1967" on your papers and letters? I'll bet you are, you scamp! But I am not one to be harsh with those who forgot we are in a new year, for I myself have long been guilty of the same lapse. In fact, in my senior year at college, I wrote 1873 on my papers until nearly November of 1874! (It turned out, incidentally, not to be such a serious error because, as we all know, 1874 was later repealed by President Chester A. Arthur in a fit of pique over the Black Tom Explosion. And, as we all know, Mr. Arthur later came to regret his hasty action. Who does not recall that famous meeting between Mr. Arthur and Louis Napoleon when Mr. Arthur said, "Lou, I wish I hadn't of repealed 1874." Whereupon the French emperor made his immortal rejoinder, "Tipt que nous et tyler tu". Well sir, they had many a good laugh about that, as you can imagine.)

But I digress. How can we remember to write 1968 on our papers and letters? Well sir, the best way is to find something memorable about 1968, something unique to fix it firmly in your mind. Happily, this is very simple because, as we all know, 1968 is the first year in history that is divisible by 2, by 5, and by 7. Take a pencil and try it: 1968 divided by 2 is 984; 1968 divided by 5 is 393.6; 1968 divided by 7 is 281.14. This mathematical curiosity will not occur again until the year 2079, but we will all be so busy then celebrating the Chester A. Arthur bi-centenary that we will scarcely have time to be writing papers and letters and like that.

Another clever little trick to fix the year 1968 in your mind is to remember that 1968 spelled backwards is 8691. "Year" spelled backwards is "raey." "Personna" spelled backwards is "Annosrep." I mention Personna because I am paid to write this column by the makers of Personna Super Stainless Steel Blades, and they are inclined to withhold my check if I omit to mention their product.

Not, mind you, that it is any chore for me to sing the praises of Personna, for it is a seemingly blade that shaves you cleanly, a gleaming blade that leaves you beaming, a trouble-free blade that leaves you stubble-free, a matchless blade that leaves you scratchless. If you are tired of facial slump, if you are fed up with jowl blight, try Personna today... available both in double-edge style and injector style. And if I seem a bit excessive in my admiration for Personna, I ask you to remember that to me Personna is more than a razor blade; it is also an employer. But I digress. We were speaking of the memorable aspects of 1968 and high among them, of course, is the fact that in 1968 the entire House of Representatives stands for election. There will, no doubt, be many lively and interesting contests, but none, I'll wager, quite so lively and interesting as the one in my own district where the leading candidate is none other than Chester A. Arthur!

Mr. Arthur, incidentally, is not the first ex-president to come out of retirement and run for the House of Representatives. John Quincy Adams was the first. Mr. Adams also holds another distinction: he was the first son of a president ever to serve as president. It is true that Martin Van Buren's son, Walter "Blinky" Van Buren, was at one time offered the nomination for the presidency, but he, alas, had already accepted a bid to become Mad Ludwig of Bavaria. James K. Polk's son, on the other hand, became Salmon P. Chase. Millard Fillmore's son went into aluminum siding. This latter became known as the Missouri Compromise.

© 1968, Max Shulman

In Missouri, or anywhere else, there is no compromise with quality in Personna or in Personna's partner in shaving pleasure—Burma-Shave. Burma-Shave comes to you in regular or menthol. Try it. You'll find it soaks rings around any other lather.

Women Gymnasts Open Season

The women's gymnastics team plays host to the Maroons of Springfield in Penn State's first meet of the 1968 season, today at 2 p.m.

Coached by Kathy Corrigan, the team will take to the White Gym floor in its third year of competition. A graduate of

Springfield College, Miss Corrigan is a veteran of the Olympic Games and various other international competitions. During her undergraduate days at Springfield, she competed in the Pan American Games in Sao Paulo, Brazil, in 1963; the 1964 Olympic Games in Tokyo, Japan, and the Gymnastrada exhibition in Vienna in 1965.

Kathy Corrigan said she is looking forward to meeting her former teammates.

"Though Springfield boasts one of the nation's top two women's teams, I feel that my girls are in fine shape and have an excellent chance to win the meet," she said.

"Last year we lost a heart-breaker to Springfield by one and a half points," the coach added. "I'm quite confident that this year will find Penn State on the winning end."

Among the girls seeing action today are Colleen Vlachos and Linda Harkleroad, co-captains competing as all-around performers. Both girls are juniors. Freshman Ginger Heltner will also be competing in the all-around division today.

The remaining five girls in

this afternoon's competition will be Carol Feldman, balance beam and floor exercise; Bette Jo Spangler, side vaulting; Sue DuVall, vaulting; and uneven parallel bars; Joan York, floor exercise and balance beam, and Judy Spatz, side horse vault.

Coach Corrigan said that the team's strongest divisions are the balance beam and the uneven parallel bars. "I'd have to say that vaulting is about our weakest event," she said.

"I feel that Penn State is among the top ten teams in the nation. We do have one thing against us and that is that most of our upcoming competition stages exhibitions at least twice a week, whereas we don't."

Last season the women gymnasts posted a 6-3 record, having lost only to Springfield, team defeated Michigan State, Kent State, and Centenary. The West Chester, Slippery Rock, Pitt, and Ohio State (twice).

Two new teams were added to this season's schedule, Ithaca College and Towson State. The next women's gymnastics meet will be held Jan. 24 at White Gym.

Litow (PS) and Nielsen (S) 8.95; 10. Sweetman (PS) 8.90; 11. Gjerstad (S) 8.85; 12. Kindon (PS) 7.15. Penn State 45.95, Scandinavia 44.65.

Final Score — Penn State 272.20, Scandinavia 270.55.

Weiss Leads State Over Scandinavia

(Continued from page one)

Finland's Olli Laiho, suffered a shoulder injury in the floor exercise, and could complete only one event, the side horse.

The Scandinavian star managed a 9.65 on that apparatus, and if he could have continued in the other events, the outcome may have been different.

"It was a sub-dislocation," a downcast Laiho said after the meet. "I hurt it first about a year ago. On the pommel horse, it was aching so badly that I couldn't see anything because of the pain."

Trailed Only Once

Penn State trailed only once in the meet, after the pommel horse competition. The Lions averaged 9.06 per event, and afterwards, Penn State Coach Gene Wettstone had words of praise for his gymnasts.

"Our performances were better tonight than they were last year against Cologne," Wettstone said. "Emery and Weiss exceeded their scores of last year, but I was a little disappointed with Coher."

Cohen was also a little disappointed with his performance but he had reservations about how well he could have done under the circumstances.

"I don't think I was well-enough prepared for the meet," said Cohen who has been spending more time on his medical studies than his gymnastics. "I tried to cram too much into too short a time. Actually I did as well as I had any right to do."

Weiss Praises Team

And all-around king Weiss had lauded the younger members of the Lion lineup, juniors Emery, Joe Litow, John Kindon and sophomore Dick Sweetman.

"This was a young team, but everyone pulled together well," Weiss said. "And what's more, this kind of thing is great for international relations."

The All-Around Competition:

1. Greg Weiss (PS)	56.45
2. Bob Emery (PS)	54.95
3. Hans Peter Nielsen (S)	54.60
4. Christer Jonsson (S)	54.15
5. Steve Cohen (PS)	54.10
6. Mauno Nissinen (S)	53.70
7. Trygve Gjerstad (S)	52.60
8. Erik Rosengren (S)	52.50
9. Dick Sweetman (PS)	52.25
10. Joe Litow (PS)	51.90
11. John Kindon (PS)	50.35
12. Thor Ingvaldsen (S)	33.90 (four events)

Lions Meet Pitt

(Continued from page four)

(16), Bill Stansfield (12.3) and Galen Godbey (11.6) are the other regulars averaging double figures.

In the rebound department, Persson, a 6-3 scrapper, again tops the squad with 76, followed by Bill Young (71), Godbey (66), and 6-2 Daley (45). The Lions have yielded 73.4 points per game while scoring 72.8 themselves.

Egli now has something he didn't possess through the first seven games—depth. Bill Stansfield, at 6-8, returned to the lineup on a regular basis recently, and two newcomers, Gregg Hamilton and Mike Eggleston, showed promise in their first bit of action Wednesday. Egli also sighted an overall increase in spirit since the duo, academically ineligible the first part of the season, started attending practice sessions.

The coach hopes to make a good showing in what may be a good opportunity for advancement today. It may be the team's last good opportunity.

SPINNING AROUND on a side horse maneuver is last night's all-around champion, Penn State's Greg Weiss. A graduate student in business at the University, Weiss came in third in this event, scoring 9.40. He averaged 9.41 on

all six events, scoring 56.45 altogether and edging out teammate Bob Emery for the honor. Behind the efforts of Weiss, Emery and the other four State participants, Gene Wettstone's squad edged the Scandinavians, 272.20-270.55.

Volkswagen introduces the automatic stick shift.

After 10 these many years our humble little bug has gone automatic. Gone is the clutch. Gone is the wifely whine, "It's cute, but I can't drive it." Gone is an era of Volkswagendom. Sniff. And in its place? A Volkswagen you can drive all over town without shifting. Only on the highway do you shift. Once. (This is an economy move. Which, after all, is still the name of the game.) But you do have a choice in the matter—you can drive it the easy way (described above). Or you can start out in low and take it through the gears like a regular stick shift. The automatic stick shift is an option; you pay a little more. But you do a little less.

Appointments Also Announced Library Display In Pattee

An exhibit depicting various aspects of the University library system has been placed on display in the main lobby of Pattee Library.

The exhibit, which will remain until Monday, includes pictures and descriptions of current and proposed library facilities on the Commonwealth campuses. A special section of the exhibit shows how a new library is built, beginning with the planning and appropriations continuing through to the actual construction.

A three dimensional model of a floor plan shows how available floor space is planned for the most efficient use.

According to William S. Pierce, assistant director for Commonwealth Campuses and continuing education, there are now eight libraries under construction at the Commonwealth Campuses. Seven of the new libraries will have a capacity of 20,000 volumes each, while the new Ogontz library will have a capacity of 30,000 volumes. Most of the libraries will be completed in 1969.

Over twenty new libraries are now either in the planning stage or under construction both on the Commonwealth Campuses and at University Park. These new libraries represent an investment of over \$30,000,000.

Library History
Part of the current exhibit is dedicated to the library facilities at University Park. The exhibit traces the history of the main library from its beginning in Old Main through the Carnegie Library, up to its present quarters in Pattee.

The exhibit continues with the future plans for the research library on the east wing of Pattee. The research library will be built in two stages, the first of which will be started later this year. A unique feature of the library system at University

Friends of India Show Hindi Film

The Friends of India Association at the University will present a Hindi movie with English subtitles today at 8 p.m. in 101 Chambers Building.

The movie is entitled "Ek Dil Sau Afsane" (One Soul and 100 Incidents). Tickets are available at the Information desk in Hetzel Union Building.

study hall, which will occupy the entire second floor. The study hall will be open 24 hours a day.

Two other branch libraries, modeled after Pollock-South, will replace the temporary facilities in East and North Halls.

Staff Changes
In other library news, three staff changes in Pattee's catalog department have been announced.

Mrs. Elizabeth Pease Bradt, appointed senior catalog librarian, comes to Penn State from her former position as senior librarian, Office of Planning Coordination for the State of New York.

Emil Rumisek has joined the staff as Slavic cataloguer. A recent graduate of the Library School of the University of Pittsburgh, Rumisek holds a master's degree in Russian Area Studies from Indiana University.

Mrs. Helen Maul Brown has been advanced to supervisor of serial cataloging, microform cataloging, and the reclassification section of the catalog department. Undergraduate Library System, Pierce said. This system, when completed, will place

Noontime Speech Set By Pollard

Ernest C. Pollard, head of the department of biophysics, will be the first speaker in a noontime series entitled "The Creative Edge." The first program will be held at 12:30 p.m. Tuesday in the Eisenhower Chapel Lounge.

Those interested may bring their lunch at 12 p.m.; coffee and tea will also be served. The purpose of the series is to encourage cross-disciplinary information and conversation, and to raise questions of human value in relation to the directions of modern knowledge. Pollard will speak on the trends of research and discovery in biophysics.

Eugene Williams, professor of geology, will preside at this first session. The series is sponsored by the faculty committee of United Campus Ministry, and is open to the public.

Justice Department Seeks Draft Lawsuit Dismissal

WASHINGTON (AP) — The Justice Department asked U.S. District Court yesterday to dismiss a lawsuit filed to prevent draft boards from hastening induction of individuals who interfere with the operation of the draft.

The action was brought by the National Student Association last December after Lt. Gen. Lewis B. Hershey, Selective Service director, recommended that draft boards reclassify as 1A those who interfere with the draft.

The Justice Department attacked the NSA suit on two grounds. That the court does not have the jurisdiction to review reclassification of Selective Service registrants before they are actually inducted, and that the student association, because it is not directly affected by any actions of a draft board, has no standing to bring the case into court.

The department said that a 1967 amendment to the Selective Service Act specifically removes jurisdiction from the federal courts to review the classification and processing of any draft registrant before he receives an order to report for induction.

In addition to the National Student Association the

suit also was joined in by Students for a Democratic Society and Campus Americans for Democratic Action. Joining the organization were 16 persons, all said to be students at various colleges. The suit is being pressed by the American Civil Liberties Union.

McCarthy Applauded

In other developments, most of an audience of 6,500 students rose and applauded Sen. Eugene McCarthy yesterday after a speech in which he said the Johnson administration is "afraid to negotiate" in the Vietnam war.
