## News Roundup: From the State, Nation & World

from the associated press

## The World

#### North Koreans Attempt Assassination

SEOUL - A North Korean captured in a daring raid on Seoul said yesterday the sole purpose of his band was to kill President Chung Hee Park and other government

The raiders were stopped Sunday less than a mile from the presidential mansion, called the Blue House, when police challenged them. Five North Koreans and seven South Koreans were killed in the clash and a North Korean

officer was captured.

The captive, 2nd Lt. Kim Shin-cho, 25, spoke at a news conference. He said there were 31 in the band and that all were members of a specially trained Communist

Kim told his story as South Korean soldiers and police searched the hills north and west of Seoul for survivors Our sole mission was to attack the Blue House, kill President Chung Hee Park and shoot to death other key personnel," Kim said.

#### Laotian Posts Abandoned to Communists

LUANG PRABANG, Laos - Fresh troops were deployed around Luang Prabang yesterday but Laotian military sources said resistance north of the royal capital has crumbled after the Communist victory at Nam Bac.

These sources said all government posts had been abandoned between Luang Prabang and Nam Bac, 60 miles to the North of the scene of a government debacle Jan. 12. They reported government control extends only a few miles in each direction from the royal capital.

Senior Laotian officers predicted a major attack on the royal capital by the North Vietnamese and Communist

Pathet Lao—estimated to number about 1,200 men.
But this view was contradicted by Western sources in Vientiane, the administrative capital to the south. They said the Communists had given clear signs through third parties that they did not want to risk all-out war by attacking Luang Prabang, where King Savang Vathana has his

#### Marines Withdraw from Vietnamese Village

SAIGON - A handful of U.S. Marines and South Vietnamese militiamen gave up trying to defend the town of Khen Sanh in South Vietnam's northwest corner yesterday after a weekend of sharp North Vietnamese attacks.
The withdrawal of the defenders set off an exodus of civilians who feared they would be at the mercy of the

Communists.

Khen Sanh is a district town made up of a complex of six mountain villages with an overall population of 10,000 persons. About 2,000 of them fled to the U.S. Marine combat base three miles north of the town in the Khe Sanh Valley. Half of them were airlifted to Da Nang. It could not be determined if the other civilians would

leave or take their chances on a North Vietnamese seizure. Associated Press correspondent Robert D. Ohman reported from the Khe Sanh combat base that U.S. Marine commanders feared the small allied force in the town could not hold out against another North Vietnamese attack

#### The Nation

#### Saturn I Rocket Launched Successfully

CAPE KENNEDY, Fla. - A powerful Saturn I rocket thundered skyward yesterday in an attempt to send America's first Lunar Module into earth orbit on a crucial test of its ability to ferry astronauts to and from the moon. During a lengthy earth orbit mission, the unmanned Lunar Module's engines were to be ignited four times in the vacuum of space to qualify the ungainly looking spaceship for a possible man-to-the-moon flight next year.

The Saturn I, more than 18 stories tall and weighing

2660-tons on liftoff, blazed away from Cape Kennedy at 5:48 p.m. EST on the tremendous 1.5 million pounds of thrust generated by its first stage power plant, a massive cluster of eight engines.

The rocket lifted off nearly four hours late because

of technical problems with ground support equipment. Gulping fuel at the rate of 42,800 gallons a minute and spurting a tail of flame the length of a football field, the mighty rocket dashed across a darkening sky, gradually nithing over the contract of the second pitching over on a southeast heading.

## Nuclear Bomber Crashes in Greenland

WASHINGTON - An Air Force B52 bomber crashed off Greenland Sunday plunging perhaps four hydrogen bombs through seven feet of ice and into freezing northern waters, government sources said yesterday.

The Pentagon, announcing bare-bone details of the accident, said the devices were unarmed "so there is no danger of a nuclear explosion at the crash site." The Defense Department disclosure of the crash came 18 hours after the B52 smacked down near Thule, Green-

land, during an emergency-landing approach. No explanation of the delay was given.
Unconfirmed reports said the \$10-million bomber was

on fire.

Of seven crewmen aboard six parachuted to safety and one died of undisclosed causes.

The Pentagon did not say how many nuclear weapons were aboard nor that they were lost. But sources said the B52 plummeted through the ice of the North Star Bay and the mass of wreckage diasappeared, making it highly doubtful the weapons could be recovered.

#### **Budgets To Be Cut To Justify Tax Hike**

WASHINGTON - The Johnson administration tried yesterday to speed congressional approval of a tax increase by outlining \$3 billion in budget cuts. But a Republican promptly accused it of not demonstrating real restraint in

Secretary of the Treasury Henry H. Fowler, pleading with the House Ways and Means Committee to approve a 10 per cent income tax surcharge, said the cuts range from space to highways—and that some will be unpopular. All together, he said, they do not save enough to offset the need for higher taxes.

But Rep. John W. Byrnes of Wisconsin, senior Republican member of the committee, told Fowler and other administration witnesses their presentation sounded to him like "business as usual, and I don't think business as

usual supports a tax increase."

Byrnes said he looked in vain in President Johnson's State of the Union message and in the preliminary budget figures for "any change of attitude" or "any sense of ur-gency or real restraint."

HAROLD WILSON

ALEXEI N. KOSYGIN

## Wilson, Kosygin Meet in Moscow

MOSCOW (AP) — Premier and the missile race has speed-Alexei N. Kosygin beg, n a dis-cussion of world problems with Diplomatic observers s u g-British Prime Minister Harold Wilson yesterday shortly after receiving a secret American message, apparently from President Johnson.

Wilson flew into frigid Moscow and immediately sat down in the Kremlin for substantive

Neither British nor Soviet officials would specify which world problems were covered in the 90-minute opening meeting but Vietnam, Cambodia and the Middle East were known to be on the list of topics for Wilson's 51-hour visit.

#### Silence on Visit

And U.S. Embassy officials and the Russians put a blanket of silence over the purpose of American Ambassador Llewellyn E. Thomps n's 30-minute Kremlin call on Kosygin.

They would only say that Thompson requested the meeting. That meant he had a message to deliver. The subject was not disclosed.

It was Thompson's first meeting with Kosygin since last Feb. 18, when he delivered Johnson's proposal for Soviet-American talks on limiting offensive and defensive nuclear not agreed yet to begin talks, ery.

positions.

Diplomatic observers suggested Thompson might have seen Kosygin about Vietnam or about Cambodia, and Wilson would be discussing both subjects. Wilson is expected to report his findings here to Johnson during a Washington visit Feb. 8-9.

Britain and the Soviet Union supplied co-chairmen for the 1954 and 1962 Geneva conferences on the Vietnam-Cambo-dia-Laos area.

Wilson tried in vain on two visits here in 1966 to win Soviet agreement to reconvening a Geneva meeting, 'ut the Russians have said they lacked authorization to represent Hanoi in such an action. On the eve of Wilson's arrival, they renewed press criti-

cism of Britain for supporting U.S. policy in Vietnam. The Soviet Union is reported

opposed to strengthening the Geneva conference's peacekeeping machinery for Cambodia, and both Wilson and Johnson are interested in

At the same time, Donolow said he table Delaware Valley school where five students partook of dangerous drugs on the school campus in the dormitory . . " As a result, he said, all became ill and one was taken to a hespital in serious condition. hospital in serious condition.

#### Students Expelled

While refusing to name names, Donolow stated:

"The five students, all from prominent families, have been expelled from the school. This, too, has been hushed up and kept a top-notch secret. All participants and students have been sworn to secrecy and not a word has leaked out. Therefore, it is not beyond the realm of belief that such an incident as the LSD controversy could be

withheld from public knowledge." Cheek made reference to LSD in his presentation before the drug board, contending that there were too many restrictions on the use of the hallucinogenic drug in medical research.

"We should reestablish the discontinued LSD research programs and update our marijuana laws," Cheek said. Student Testifies

Harold Wilson, a senior at Lincoln, was among three students who testi-fied. He said he had seen fellow students use marijuana but had never noticed any adverse effects caused by the drug.

gans of the body. What does marijuan as someone might take a cordial," Wilson said. "There were no visible effects."

Comparing marijuana to alcohol, Wilson said:

"Alcohol deteriorates certain organs of the body, What does marijuana deteriorate?"

Other college administrators who testified told of steps taken at their institutions to discourage students from using illegal drugs and to co-operate with law enforcement agencies

in the arrest and prosecution of pushers. Some administrators told the board they had no evidence that any of their students were drug users, but one stu-dent questioned whether there was any college in the state where the problem

fraternities' lists of the sororities with whom they would like to work for Spring Week are due in the IFC office no later than 5:00 p.m. today. The lists will be given to the sororities tonight

Sororities will then compile lists of their fraternity preferences and turn them in to the IFC Office by 5:00 p.m. Thursday. The results of the bidding will be announced as soon as the lists are computerized, the lowest possible numerical combinations producing the sorority-fraternity pairs for Spring Week.

Rolnick added that open bidding by fraternities to sororities will take place until Spring Week.

Also in regard to Spring Week, Lowen said that a representative of IFC will be named to the Spring Week Committee of the Undergraduate Student Government to help with financial planning and the scheduling of this all-University event.

## Tickets Available For Philharmonic

Tickets for the Royal Philharmonic Orchestra of London, scheduled for Recreation Building tonight, will be available starting at 8 p.m. at the Rec Hall doors.

The concert, presented by the Artists' Series, will begin at 8:30 p.m. Vaclav Neumann will

1 1950

yesterday, Artists Series offi-cials said last night, pointing out that the sale will continue from 9 a.m. to 5 p.m. today at the main desk of the Hetzel Union Building.
Unused Tickets Students who obtain tickets for Artists Series performances and then do not use them are

Approximately 4,000 tickets had been distributed to students

or sold to the public by late

beginning to pose "quite a problem," according to Mrs. Nina Brown, of the Artists Series Committee.
Out of 5,000 student tickets distributed for the recent Ravi Shankar concert, over 600 were not used, she said. Many stu-dents were not able to obtain tickets for this concert before the program, because of an ap-

parent "sell-out."
Schwab was filled for the Bach Aria Group only because "unfortunately we oversold," Mrs. Brown stated. Nearly 150 students who had taken tickets did not come to the concert.
"Just because these tickets

they're worthless," she added.
"You'd pay from \$5 to \$12 to
hear any of these groups in
New York."

are free, people shouldn't think

Mrs. Brown said the committee was discussing ways to remedy the situation.

Will Conduct Tonight

## Wishing Won't Help

Walker expressed his disappointment with the predominantly m'ddle-class composition of the undergraduate encollment here. His remarks seemed to indicate a desire to change the situation.

But in the light of Vice President for Resident Instruction Paul M. Althouse's comment that the University cannot compromise its admissions policy to admit students with less than adequate academic preparation due to underprivileged backgrounds, Walker's lamentations look like nothing more than remarks designed to ease a burdened social conscience.

The University may wish for a more heterogenous enrollment but apparently it has no intention of doing anything to turn wishes into reality.

Despite Althouse's claim that nothing would be accomplished by admitting inadequately prepared but academically promising students, the facts prove him wrong.

Private universities such as Harvard, to name only one, have for several years made it a matter of policy to admit a small number of students who appear to have promising native ability but who have not been afforded adequate educational backgrounds.

The results have been good and the academic

TUESDAY, JANUARY 23, 1968

Several weeks ago University President Eric A. reputation of Harvard has hardly been impaired. Althouse's reasoning breaks down at other

points, too. He readily admits that no institution, Penn State included, can make claims to a completely undiscriminatory admissions policy, yet he argues that there could be no justification for rejecting a well-qualified student in favor of a bright, but culturally disadvantaged student.

Apparently he is unaware of the social necessity of affording marginally qualified applicants the chance to rise above their environmentally imposed limitations.

It is reasonable to assume that the well-qualified student rejected by Penn State will have no problems being admitted to numerous other institutions solely on the basis of his academic record.

· The opportunities for the bright, but culturally disadvantaged applicant are not so numerous

To refuse to adopt a flexible admissions policy in regards to culturally deprived applicants because such an action is not a matter of policy, is simply to beg the question.

It is heartening that private institutions have recognized the importance of a flexible admissions policy, but it is imperative that institutions such as Penn State, long dedicated to public service, wake up to the necessity of meeting the educational needs of

## Letters to the Editor

#### Stony Brook Restraint

TO THE EDITOR: The editorial staff of The Collegian has a tendency to get carried away with its own convictions. As the self-styled champion of freedom of the individual, it often goes overboard in opposition to what it considers threats to this freedom. As a result, it often loses its perspective and attacks the wrong aspect of the issue at hand. An example is its handling of "The Stony Brook Outrage," in which it protests a police raid on a marijuana

The Collegian seems surprised and hurt that the police enforce narcotics laws. Because it considers the question of drugs a "touchy" problem, it protests the upholding of these laws. It forgets that the purpose and duty of law-enforcement officers is to enforce ALL of the laws to the best of their ability. If they ignore any law because it is unpopular or against the principles of certain parties, they are failing in their responsibility to the

The editorial labeled the raid a "Gestapo-like" tactic, yet there is no evidence that any of the students were denied their Constitutional rights. It objects to the use of 198 policement to arrest 33 violators, implying that the purpose was to intimidate or humiliate the students. More likely, it was a simple overestimation of the number of students involved.

It complains because the raid was at 5 a.m., again hinting that this was a strong-arm tactic. However, the element of surprise was not diabolical in this instance—it was necessary for the arrest of the violators and the confiscation of the drugs.

The reference to the police's "excitement" at the prospect of a raid was childish and does not deserve fur-

The Collegian has every right to oppose what many, including myself, consider unfair and outdated narcotics laws. However, it has no right to berate the legal enforcement of these laws. The "academic community," of which it likes to consider itself the spokesman, is not above the law. Those arrested at Stony Brook knew they were breaking the law; they should have the courage to accept

#### J. Robert Shore

## The Great

"Americans are prosperous as men have never been in recorded history. Yet there is in the land a certain restlessness - a questioning.

"Why, then, this restlessness?

"Because when a great ship cuts through the sea, the waters are stirred and troubled. And our ship is moving -moving through new waters, toward new shores.

When 1969 rolls around, writers may be fond of quoting the above passage from the President's State of the Union message, calling it the cop-out of the year. After such presidential reasoning, it's terribly difficult to remain emotionally detached and write calmly about

Mr. Johnson's poetry and failure to grasp reality or at least to tell the truth.

It's hard to imagine such presidential naivete. The president should stop fooling himself (if indeed he is)

and realize that it's statements like the aforementioned one which give vent to "a certain restlessness" so pre-America is questioning its leader. This administra-tion talks one way and acts another, J. W. Fulbright,

Chairman of the Senate Foreign Relations Committee, said two days ago.
On a nationally televised program Fulbright said he

did not know what our objectives were in Vietnam. If the man who's supposed to figure prominently in formulating our foreign policy doesn't know our Asian objectives, then someone, maybe the president, is not owning up to his responsibility as a public servant.

How can the public be sure that the President is say-

ing what he means when he has confused Fulbright and practically every other congressman? Don't you think this "credibility gap" is causing some people to question the

But the "credibility gap" does not end in Vietnam and the war is not the only reason Americans are restless. Mr. Johnson and his staff have been saying throughout the year that we can fight a domestic and Asian war, Yet lock what happened this summer. If this country had

been fighting poverty effectively, the riots might never have occurred. And last fall, anti-poverty program advocates had to

fight every inch of the way for congressional appropria-tions which ended up to be hardly sufficient. Evidence seems to indicate that we cannot effectively

wage two wars simultaneously. How do Americans reconcile this apparent fact with the President's statements? How does one react when the President and his economic advisors demand a tax increase to stave off inflation and Congress responds negatively? Do we question,

become restless? The President knows that marijuana is available everywhere and is being rapidly consumed by many peo-ple—from our armed forces in Vietnam to high school

children.
"It is time to stop the sale of slavery to the young,"
the President said as he called for more vigorous law enforcement against drug abuse.

Thus Mr. Johnson, in his characteristic way, attacks the problem and not its cause. Scientists are not positive of marijuana's effects on the body. They should be encouraged, not restricted as they are by present laws, to experiment with the drug.

It doesn't take much clairvoyance to foresee the day

when pot will take over alcohol's traditional role as the great American relaxer.

It was politically unwise for the President to pose the question he did. However, he would have been dere-lict in his description of the state of the union had he not modestly noted "a certain restlessness." When the President or members of his staff cannot walk the streets of any major city in safety then you

might say there's a certain restlessness afoot. For Mr. Johnson to have answered his question properly he would have had to tell the truth, for a change, about

ry he would have had to tell the ruth, for a change, about past and present situations. This would probably have cost him the presidential election in 1968.

However, if he continues steering his "great ship," employing the same navigational methods, the Great Society may end up on the rocks off shore.

. LETTER POLICY

The Daily Collesian accepts letters to the editor regarding Collesian news coverage or editorial policy and campus or non-campus affairs. Letters must be typewritten, no more than two passes in length, and should be brought to the office of the Daily Collesian in person so that identification of the writer can be checked. If letters are received by mail. The Collesian will contact the signer for verification. The Daily Collesian reserves the right to select which letters will be published and to edit letters for style and content.

# GREEK WEEK CONCERT

## Approved for Ogontz million multi-purpose building have been approved for the University's Ogontz Campus. The three-story classroom-librarylecture hall will be constructed on the Abington.

northwest edge of the 45-acre campus The ground floor of the library wing will include a reading and stack

room, communications room, microfilm room, and a staff reading room. The first floor will contain a reading and stack area, two offices, a work

room, and a conference room, all in the library wing; a 200 seat auditorium-lecture hall, computer laboratory, two physics laboratories, an independent study laboratory, demonstration room, physics preparation area and a dark The second floor will feature a stack and reading area, seminar rooms, five study-listening rooms and a bal-

cony to the lecture hall, all in the library wing; four offices, a classroom, two general chemistry laboratories, an

independent study laboratory, in addition to preparation and storage areas for chemistry. The third floor of the building will house four offices, three classrooms, an organic chemistry laboratory, two in-

dependent study laboratories, an instrument room, and storage and prepara-tion areas for the chemistry laboratory. Total project cost is \$2,337,103, with funds coming from the General State Authority, and the Federal High-

er Education Facilities Act. Construction of the building is expected to begin later this year.

Ogontz, largest of the Penn State branch campuses, completed construc-tion of a study-learning center last fall.

In other Commonwealth Campus news, the Scranton Campus announced that for the first time in its history it will offer undergraduate majors leading toward the baccalaureate degree— both science and non-science—beginning with the Fall Term of this year.

Students will be able to begin work in more than 100 different majors beginning with the freshman year. The sophomore year of many of these programs will be added beginning with fall, 1969. Work completed by students at the Scranton Campus will be transferrable to upper division campuses of

Penn State or to other institutions. The new offerings are made possible by the completion of a new \$1.4 million building at the permanent campus site near Dunmore. The multi-purpose building, a three-story brick structure is the first of a five-building complex planned for the Campus during the next few years.

It contains a number of classrooms, laboratories, drafting rooms, computer facilities, faculty and administrative offices and a temporary library.,

The building was constructed with a \$300,000 local fund-raising campaign, plus General State Authority funding and Federal matching grants.

the University's Colleges of Science, Liberal Arts, Education, Human De-velopment, Health and Physical Education, Business Administration, Arts and Architecture, Engineering and Mineral Industries.

The new offerings include work in

## Foundation Grant Increases International Student Fund

the Creole Foundation has been added to the emergency loan fund for international students, bringing the total amount of the fund to approximately \$4,500. Gifts from local community organizations have augmented the fund from time to time.

The Foundation, which was created by the Creole Petroleum Corporation of Venezuela, makes such unrestricted grants to in-stitutions where Venezuelan students holding-Creole scholarships are enrolled.

Luis Urdaneta, current recipient of the Creole Scholarship, has earned his master's degree in petroleum and natural gas engineering at the University and is a candidate for a master's degree in computer science.

The Creole emergency loan fund was created with the grants in response to needs frequently encountered by international stu-dents, according to D. V. Scalzi, director of the Office of International Student Affairs.

The fund is used only to meet emergency situations, Scalzi explained. International students sometimes arrive on the repayment of loans.

A grant of \$500 to the University from campus with very little cash because of currency restrictions in their home countries. They need financial help until banking ar-

rangements have been completed or until they receive their first pay checks.

During the past calendar year, Scalzi reports, almost every dollar in the fund did double duty; loans averaging \$112 were made to 71 individuals, for a total of \$7,941, from a fund of only \$4,000. This is possible because students borrowing money are asked to repay as quickly as possible so that the to repay as quickly as possible so that the fund is self-perpetuating.

Most of the request for loans come at the beginning of the Fall Term, although emergencies occur throughout the year. A student may need money because of a delay in financial help from home, an urgent home emergency, or exigencies in connection with

his University work.

Loans are made from the fund by the director of student aid upon recommendation of the director of international student affairs. Scalzi reports that the fund has suffered less than 1 per cent loss because of non-

## Architecture Lecture Wednesday

THOMAS A. BULLOCK, EXECUTIVE PARTNER OF CAUDILL, ROWLETT & SCOTT, Architects, Planners and Engineers, will give a slide-illustrated lecture at 7:30 p.m. tomorrow in 126 Sackett. His topic will be aspects of engineering and architecture in his firm's construction of the Jesse H. Jones Hall for Performing Arts in Houston, Tex., which won the 1967 American Institute of Architects Honor Award. Sponsored by the Student Society of Architectural Engineers, the program is open to the public.

'In Heat of Battle'

## U.S. Troops Cross Cambodian Border

WASHINGTON (P) — The United States acknowledged yesterday that a U.S.-Vietnamese patrol had crossed Cambodia's border "during the heat of battle" with Viet Cong guerrillas.

The State Department said it sent formal regrets for any Cambodian casualties that may have resulted from what it called an unintended intrusion 75 yards inside Cambodian territory last Thursday,

Prince Norodom Sihanouk, Cambodia's chief of state. has demanded that the International Control Commission investigate the violation of his border and the killing of three Cambodians during the fight.

Robert J. McCloskey. State Department press officer, said the incidents occurred while an American-South Vietnamese patrol was defending itself from Viet Cong gunfire coming from both sides of the Vietnam-Cambodian

"We regret the intrusion," McCloskey said. "It was unintended and undertaken without any hostile intent."

It was the first officially acknowledged case in which American forces invoked the right of self defense enunciated a week ago by Asst. Secretary of State William P.

Bundy told newsmen that the United States would continue to exercise this right if Communist Viet Cong and North Vietnamese forces used Cambodia as a base for attacking American forces in Vietnam and as a sanctuary for retreat.

Bundy's statement followed a protest by the Soviet Union on Jan. 12 that it "will not remain indifferent" to U.S. violations of Cambodia's frontiers.

McCloskey said yesterday that complete reports have not yet been received on last Thursday's border fight, but he said preliminary information indicates that the clash occurred in a village on the South Vietnam side of the border between Prey Veng province in Cambodia and Kieng Phong province in South Vietnam.

McCloskey described the village as being "inside the bend of the border, two-thirds surrounded by Cambodian

## Nice Guys Finish Last in Coaching Ranks

Collegian Sports Editor

John Egli sat alone in his little Rec Hall office yesterday afternoon. It had not been an easy day.

He had known since early in September that this was to be his last year coaching basketball at Penn State, but he hadn't expected the world to find out the way it did. It isn't a pleasant experi-

ence to wake up one morning and find the newspapers saying you've been fired. Especially when it isn't

Likewise, if you're a basketball coach, it is rather unpleasant to read that your job is going to be taken by a coach whose record is not as impressive as your own, or by another one who once had a losing record at Punxsutawney High School.

Compression of the control of the co

If John Egli was a business executive who was changing positions, the world would take little notice. But Egli is a basketball coach, and the world has always assumed the right to pry into the lives of such people. So, if a 47-year old man who has devoted his life to a game, wakes up one day to read that he's been a failure, it doesn't matter. Or, if his wife does her housework with tears in her eyes, it doesn't matter to the people who write the stories.

wrong. It matters that John Egli has not been a failure, that John Egli has not been fired and that John Egli is too nice a guy to have to go through all this.

The facts are simple. Too simple, it seems, for some to recognize. The administration wanted a change in the basketball program. John Egli wanted out of coaching. Penn State needed someone to direct athletics at its 19 Commonwealth campuses. With things fitting together so nicely, no one should have been hurt.

But John Egli was hurt. Yesterday, as he sat at his desk and stared at the floor, John Edli seemed very old. He talked slowly and deliberately as he remembered 22 years at Penn State.

"I don't think anything has been a bigger thrill for me than playing basketball for Penn State,' Egli said as his memory took him back to 1942. "But it's been a great thrill just being associated with the University all these years."

Egli recalled his first team after he became head coach. The thoughts were of 1954 and of Jesse Arnelle, Penn State's all-time scoring leader. Arnelle led Egli's team to a 17-8 record and the NCAA tournament that year.

"Nobody thought we'd ever make the tourna-ment," Egli reminisced. "The year before, the team had reached the semi-finals of the NCAA's, and people said we'd never get back. But down in Lexington, Ky., we beat the nation's highest scoring team, Memphis State, in a regional playoff."

Egli remembered 1964-1965, and the "greatest team I ever had." He thought of Bob Weiss Carver Clinton, Jimmy Reed, Ron Avillion and Ray Saunders, the starting five that won more games than any other team in Penn State history. He remembered every detail of the team which took a 20-3 record into the NCAA playoffs before losing 60-58 to Bill Bradley and Princeton.

But he refused to single out any one player who could be considered the best to come out of

the Egli Era.
"I wouldn't want to slight any of my players by choosing one as the best," Egli said. "There are times when I feel that they've all been the greatest."

Egli knows that through the years he has come under strong criticism for his recruiting, or as some feel, for his lack of it. Egli, who has won more games than any other Lion coach, doesn't believe in high-pressure tactics.

His is the low-key, the soft sell, and it has two basic flaws. Like Egli himself, the pitch is frank and honest. Nice qualities for a man of the cloth, but for a man of the court, it draws fire from fans and alumni who measure success in more tangible qualities. "You shouldn't have to recruit a boy and sell

him the school's basketball program," Egli has often said. "If you do, you're not giving him the best picture of what the institution is charged to give him. He must get an education first, and if basketball can supplement his education, I'm all for it." Another Egli characteristic has been zone de-

fense. He's used it ever since he came here, molding and modifying it into the "sliding zone" which won national acclaim from his fellow coaches in

"Five men helping each other—that's the basis of the zone defense," Egli said. "When they do the job and move, it's the finest defense in the world. It's the best way to bring a team that doesn't have the physical skills up to the same level as a team of natural athletes."

JOHN EGLI

Egli has used the zone defense for 14 years, and most of the time it has worked. Teams seemingly destined for mediocrity have been turned into winners.

"Perhaps my weakness is not going out and recruiting the fast, quick, tall boys." Egli said. "But you look at my boys. They're the finest. They all qualified for admission. That's

... Too Nice a Guy for admis always the first thing I looked for" For Egli the switch to an administrator will not' be an easy one. He has spent most of his adult

life on the hardwood floors of gymnasiums and in the humid sweat of locker rooms. It won't be an easy adjustment to make. When I started, I figured I wanted to coach

about 20 or 25 years," Egli said. "Counting the army, high school and college, this is my 25th year. That's long enough for anyone. The game has changed. As you become older, you don't keep up with it. Maybe I could coach another five years and do a good job. But I don't want to get old in the coaching profession. It's not the place for an old man."

And, unfortunately, it's not the place for the man of honesty and sincerity. Not the place for the nice guy.

# John Egli To Step Down as Coach

By PAUL LEVINE

Collegian Sports Editor John Egli will stop down as Penn State's head basketball coach at the end of the current puses. Having come up through the Commonseason to become supervisor of the sports programs at the University's 19 Commonwealth ground for the job." Campuses.

In making the announcement yesterday, Penn State athletic director Ernest B. McCoy last year. According to a University official, within the rules." said that he and Egli had agreed upon this the changes were not scheduled for release change of duties before the start of the season.

"It's important to realize that no one is being fired," McCoy said. "John is taking over a very important job. We need someone with a several persons are under consideration for wide experience and background in sports. John has coached baseball, basketball and has run our summer tennis program. He is the best equipped of our staff for the job."

Started at Dubois

Egli was instructor of physical education, director of the intramural and varsity athletic programs and head basketball coach at Penn State's Dubois Campus before becoming assistant basketball coach at Penn State in 1949.

program of athletics for our Commonwealth 18 games each. Campuses," Egli said yesterday. "Every year

until the end of basketball season.

as last September," McCoy said. "Presently, the coaching job."

Bach May Be Next

McCoy indicated that John Bach, the Fordham University coach, is one of the candidates. The 43-year-old Bach is in his 18th season at Fordham. He is due to relinquish his coaching job at the end of this season to devote full time to his duties as athletic director. He has a career record of 253-189, including 9-3 so far this year. Six of his teams have gone "I've long been a firm believer in a strong to tournaments with three of them winning

Bach has indicated that he may visit the Campus of Penn State.

fewer and fewer freshmen come to the Uni- Penn State campus in the near future. Another coach under consideration is Chuck

"We're looking for a teacher, a coach who teaches the fundamentals," McCoy said. "In recruiting he would have to find the proper Yesterday's announcement followed Asso- type of student-athlete who understands our ciated Press reports that this was to be Egli's philosophy-no nonsense, with everything done

His 14th Year

Now in his 14th year as head coach, the "John and I had talked this over as early 47-year-old Egli has a record of 182-130, including 5-5 this year. A native of Williamsport, he graduated from Penn State in 1943. He was a member of the Nittany Lions' 1942 basketball team which finished the season 18-3 and was the first Penn State team to play in the NCAA championship tournament. As co-captain of the team in his senior year Egli was considered a rugged defensive player who also excelled in follow-up shots.

Egli's first coaching position was at Derry Township High School in 1946 where he also taught health and physical education and served as assistant baseball and football coach. The following year, he joined the Dubois

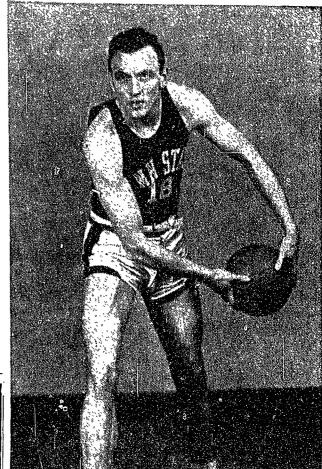

In 1949, Egli came to University Park as assistant coach to Elmer Gross. He served in that capacity for five years, during which time he also coached freshman baseball,

He was named head basketball coach for the 1954-55 season, and in his first campaign took the Nittany Lions into the NCAA tournament after finishing the regular schedule with a 17-8 record.

Defense Carried Over

Egli's defensive ability as a player carried over into his coaching as he gained fame for the "sliding zone" defense which he perfected. Currently, Egli is writing a book on that part of the game dedicated to stopping the score.

His greatest years came in the mid 1960's, when-in a four year period-the Lions won 69 games and lost only 22. The 1964-65 team finished the regular season 20-3 before dropping a 60-58 heartbreaker to the Bill Bradley-led Princeton team in the first round of the NCAA tournament. In 1965-1966 the Lions recorded an 18-5 mark before falling 89-77 to San Francisco in the opening game of the National Invitational Tournament. Last year, the Lions fell to a 10-14 record.

TWENTY-FIVE YEARS ago, John Egli was an outstanding basketball player for Penn State. The 6-3, 180 pounder was co-captain of the 1942-1943 team that finished 15-4. After 14 years as head coach of the Nittany Lion basketball team, Egli will step aside to take over a new position as supervisor of the Commonwealth Campus sports

## What does a NASA project have to do with flipping tractors?

A lot. At International Harvester, down-to-earth safety problems with tractors are being solved with space-age techniques. IH engineers checking roll bar stresses in tractor roll-overs use the same basic radio telemeter that gathers data from rockets. But IH involvement with the space age doesn't stop here. Special International® trucks filter rocket fuels. Exotic IH metal fabrications are used in building rockets. When you join IH, you're joining a leader in the important fields for tomorrow's world. Fields as basic and challenging as farm equipment and trucks. Fields as new as aerospace and gas turbine power. Any company can'turn you on. But few are in as many basic industries as International Harvester. Our diversification multiplies your opportunities. Ask your College Placement Office for more information about us.

Assistant Sports Editor

On the surface, it looked as though Penn State's basketball team suffered grave humiliation in front of television cameras Saturday afternoon, losing to West Virginia the way it did. And this time the Lions put on one of their poorer showings of the season,

However, another group, numbering close to 5,600, banded together to show six viewing states and Washington, D.C., what they could do best at a basketball game. They laid an egg. A great big one.

You see, Recreation Hall is rapidly getting the reputation of being something akin to the Bronx Aviary. There they sit, every Wednesday night or, Saturday afternoon when a game is played, perched at various places in

KOLB

the bleachers. the University Park Boo-birds waiting to seize the opportunity to emit their characteristic call.

Herein to be referred to as "fans" for lack of a better or allowable term, they either say or yell something obnoxious or they don't yell anything at all. It's debatable which case is worse.

The Penn State cheerleaders were in attendance Saturday afternoon. Whether or not they were there only because of TV exposure is anybody's guess. Anyway their efforts were about as effective as anti-pollution laws in Tyrone. Either the student body had forgotten the cheers or the student body had forgotten the student

At one point a "Let's Go" cheer was begun during a time out, when Penn State only trailed by three points. No response. The Nittany Lion mascot stood in front of a wall of fans and emphatically conducted

Nittany Lion raised his paws and gave a "go home" gesture to the onlookers. Hail to the Lion, loyal and true.

"It was awfully quiet out there," Mountaineer coach Bucky Waters said in the locker room after the game. "I've never known it to be like that, especially up

It was true that West Virginia team's, even the great ones, had a habit of losing in Rec Hall, while Penn State did the same in Morganiown. The Mounties had lost their last four appearances in University Park. This time they won with ease, and most importantly, they won in relative silence.

Oh, there were a couple rather vociferous outbursts on occasion. Just before the half, with State down by seven points, the fans decided to start counting passes. They always seem to start counting passes, because it's clever and it shakes up the opposition. Real shaky. West Virginia had gotten as far as nine passes, acording to the mass calculation, when guard Lewis Hale threw in a 30-footer.

As it swished through the net, the Mountaineer bench, in unison, shouted, "Yeah, and that's 10, that's 10." The counting never started again.

The practice of trying to rattle the opponents takes on many forms. Some schools offer deafening chants. Others sing and applaud. Pass-counting started at this institution about three or four years ago, but it wasn't used for entertainment. It served a purpose.

Back in 1964, 1965 and 1966, Penn State fielded championship teams. Those were the days teams tried to figure out how to stop the Lions, and not vica versa. One method they tried repeatedly was to stall, to control the ball for minutes at a time so State couldn't roll up the score. The fans, understandably, had come to see action, so they decided to take matters into their own hands and started counting passes. Many times a steal or a bad pass resulted, and PSU turned the mistake into a score. Counting was saved for such handy situ-

Last year, State's basketball team was far from championship caliber, and rarely

turned what had been a useful idea into a farce, and the counting began almost anytime in the game.

It began to bother the opposing coaches and then the officials, and finally John Egli himself. During a game with Syracuse at Rec Hall, the coach stopped the game, grabbed the microphone and asked that the counting be stopped or a technical foul would be called against the Lions. Luckily, that's as far as it went.

Now things are getting out of hand. Again, this year's team isn't a world beater, but they deserve a better fate fan-wise. Witness example number two:

Bill Stansfield, the Lions' 6-8 center, went into Saturday's game with a taped right arm, healing from an early-season fracture; a taped right ankle, smarting from a practice injury the night before; and a taped right hip, which had also been bruised. He had trouble maneuvering for shots and frequently missed close attempts. The crowd booed vehemently. Late in the game Stansfield fouled out and the applause he received seemed more of a "good riddance" than a "nice game" reply.

It's kind of like kicking your mother

By the way, Stansfield scored 12 points and hauled down a game-high 16 rebounds, more than any Mountaineer. Which proves you can please some of the people some of the time, etc.

One student remarked, "I don't go to see basketball out here. Back at the Palestra, there was spirit and they really play basketball." Actually, (a) the baskets are 10 feet in State College, too., (b) spirit isn't invented; it's made by attendance and loyalty, and (c) loyalty is not a variable proportionate with wins and losses; it should be a constant.

Home attendance is declining fast, almost as fast as sportsmanship in the stands. Let this be a challenge: Notice the crowd in Morgantown Wednesday night, think about what happened to athletics at Pitt, and think about the TV impression made Saturday afternoon. Then consider next Wednesday night's home game against

Then maybe call yourself a fan.

# Our Fans: Bush Is the Word WVU Tops Lions

By RON KOLB

Assistant Sports Editor

West Virginia held a commanding 19point lead with just over 11 minutes left in last Saturday's game in Rec Hall, Ron Williams stole a Penn State pass and dribbled the length of the court, laying it in for another score.

On the Mountaineer bench, little Jimmy Lewis stood up straight and tall in a Statue of Liberty pose. He began twirling his right arm in a circle, and looking up into the lights, he shouted, "Man, it's all over." Truer words were never spoken.

Lewis is an emotional sort of guy, but he knows a good thing when he sees one. A week earlier he had found himself on the foul line against Davidson, nine seconds left in the game and his team down by one point. It was a one-and-one situation, and after making the first one, he broke down and cried, right out on the court. West Virginia had to call time out until he recovered. Lewis missed the second, but the Mounties went on to win by three points in overtime. A Different Position

This time Lewis was in a somewhat different position, on the bench. He has had operations on both knees and has broken his foot, but this time it was the flu that

put him out of action. Still, as a bench jockey, he called a beautiful game.

And as he called it, Ron Williams played it. The first six West Virginia points were scored by Williams. Twelve of the first 18 WVU points were scored by Williams. And when it was over, 30 of the team's 88 points were scored by Williams. Penn State ended up with 66 points and admiration for

an All-American.

Lion coach John Egli was asked about the performance of the 6-3 Mountaineer guard. "Actually, Williams had an off-day," he commented. "We moved him clear out beyond the foul circle and he dropped them in like they were nothing." in like they were nothing."

Lost His Lens Earlier in the game, Williams had lost a contact lens in a battle for the rebound, but he found it seconds later. "It's just too bad he found that lens," Egli said jokingly after

the game.

Not that it would have mattered that much. As a sophomore during a game against Duke, he whispered to a teammate, "Psst. Duke, he whispered to a teammate, "Psst, What's the score?" He was told, "It's 92-90. Five seconds left." Williams waited a moment, and then asked, "Psst, Who's winning." He couldn't even see the scoreboard and still averaged 20 points a game.

Penn State, meanwhile, had reverted back to an old form that seemed to have been deserted for three games. "We just stood around," Egli explained, somewhat bewildered. "Our rebounding and ball handling were horrible, and we didn't stay tenaciously in our offensive patterns. We weren't alert

west Virginia was both alert and aggressive when the opportunity was there. With 1:29 left in the first half, State had pulled to within three at 36-33. Five straight points before the buzzer widened WVU's gap to 41-33.
Then the Mountaineers took advantage

turnovers in the second half, several short of the first half total) and outscored State, 24-8 in the next nine minutes. At 62-41, Jimmy Lewis heroically proclaimed the

Not Only One

Lewis wasn't the only one with flu troubles. Teammate Carey Bailey, the 6-5 center, was an unsure starter, having con-tracted "the bug" which coach Bucky Wa-ters said had been with the team since the

Holiday Festival Tournament in December. As a result, Bailey grabbed 11 rebounds and scored 11 points. His opposing player, 6-8 Bill Stansfield, had several injuries but still tossed in 12 points and cleared a game-high 16 rebounds. Not bad for a couple of in-

valids.
"It was definitely our best away game
"Waters said after the win. of the season," Waters said after the win. We got a real good start, which is important especially up here. And I think we did it

Egli echoed, "They played a fine defense, and they can really get up for the rebounds. I don't see how they lost any of their genee." their\_games.'

The Mountaineer defensive strategy was this: Waters started three guards, including Norman Holmes, best of the defenders. Giving up some scoring punch, the coach hoped to hold down the outside shooting of Jeff Persson and Tom Daley, Holmes held Pers-

son to two points in the first half. Daley hit for 14 but was blanked the rest of the way. Can Come Back Perhaps the only good thing about back-to-back series like this is that the losing team can always come back and avenge an opening defeat. State will attempt such a feat tomorrow night, but a win in Morgantown is as frequent for a visiting team as a

summer snowstorm.
One reporter asked Egli, "What do you have to change when you go down there to meet them again?" In a half serious, half apologetic tone, he replied, "Well, I guess we'll have to change the coach."

## Lowest Possible Score Team 'Perfect'

## By DICK ZELLER

Collegian Sports Writer

"A perfect swimming meet." scribed last Saturday's debacle at the U.S. Naval Academy. He didn't use "perfect" in its usual connotation, however.

There are 13 events in college swimming and the lowest amount a team can score is 11. That's exactly what the Nittany Lions did as they swept 11 third places and a second in each the two relays to lose to the Midshipmen by the rather lop-sided score of 102-11.

In Triple Figures It's probably one if the few times an NCAA swimming will have a score in triple figures, though State may see one or two more before the season is ever.

To further qualify the performance, MacNeill said, "John Higgins, the Navy coach, is a gentleman. He used his third and fourth best swimmers and switched people from their normal events. Everyone on his team is good.'

Of his own team, MacNeill Pool mark of 3:42.3. said he was disappointed in most performances, especially meter diving mark of 116.65 the 3:46 time in the 400-yd. points the first time the event That is how Penn State's swimming coach, Lou Mac Neill desaurday morning and a rough meet. night's sleep in the strange Annapolis environment were cited as reasons for the slower

> On the positive side of the ledger, six Penn State records were established, most of them breaking the imes established against Temple last week. The 400-yd, medley relay team of Moser, Yarema, Eisen.

> stadt, and Pearson cut last week's 4:21.4 to a 4.19.4. Ron Menning gained 112.6 points to increase his one meter diving record. Gene Weber lost his 200-yd. freestyle record to Manard and Brian Kudis clocked a 2:27.7 to claim the 200-yd. individual medley rec-

#### Broke Breaststroke

John Oleyar, a sophomore from Clairton, broke the 200yd, breaststroke record set by Clyde Bell in 1947. His 2:41.7 shattered the old Glennland

Navy's Top

Navy's top performances came from the 400-yard Medley Relay team (3:51.0), the 100-yd. and 500-yd. freest: le events (Swanson, with a 52.0 in the 100 and Herring, in 5:27.0 in the 500). Stockdale turned in a brilliant 2:25.7 in the 200-yd. breaststroke.

The Middies are now 2-4 on the season but are sure to come in strong in the Eastern meet at the end of the season, where it really counts.

As for the Lions, this makes them 0-2.

On Saturday at 2 .m. the State contingent will play host to Pitt. MacNeill claim: that, unlike most other Pitt squads, the swimming team is fairly strong. "They're not as powerful as Navy, but we still end up with all third places," he said.

Mr. Richard Herrmann representing the Bethlehem Central School District, Albany County, Delmar, New York, will interview interested candidates in the academic areas of science, math, English and social studies and candidates for elementary school positions. K-6, on Wednesday and Thursday, Feb. 7 and 8 from 9-12 and 1:30-4:00, Grange Building.

# Off-Campus Housing:

## By RICHARD WIESENHUTTER

Collegian Éditor

"I call it Disneyland," the student said, showing much less than luxurious living quarters with a gesture of his hand.

"Over here is Frontierland," he continued, pointing to a kitchen that looked like a stage seting for Jackie Gleason's Honeymooners. "It's an adventure trying to prepare any kind of meal when you've got a refrigerator like this and a stove and sink like that."

It was hard to disagree. The refrigerator was almost 20 years old and stood lopsided. There was a long wait for hot water to come out of the faucet in the sink.

"The living room is Fantasyland," he went on. "The sofas and chairs are originals from a 14th century medieval castle. And they haven't been restored. It's Adventureland when you sit on them because you never know what's going to happen."

"Over here you're in Jungleland," he said, taking his tour into the combination bedroombathroom. "Notice the plants growing in through the corner of the window."

There were vines trailing through a splintered windowpane which opened to a view of trash and garbage cans.

"I wouldn't advise spending too much time in the bathroom part of the room or taking a shower since you can't be sure where the water's really coming from."

"And that's my apartment," he concluded.

That apartment and its features typify many others in State College, but not every student living in similar quarters in town finds as much to joke about as this one student does.

Overall living conditions in State College range from new, plush \$275 plus apartments to \$50 attic rooms in older homes. The latter, less desirable living conditions are more prevalent. And, although locations differ, the problems seem to be about the same — not many students are satisfied with their homes away from home.

Off-campus housing problems are not new. Generations of students in almost every large university have had gripes about their living quarters. But, the past year saw many of these complaints intensify at Penn State.

Heeding the cries, the Town Independent Men's Council, which represents 6,000 men off campus, stepped in to give town dwellers a united, organized voice.

TIM, a 13-year-old organization, has already made a successful push for the State College Housing Code, realized in 1962. Since October, TIM representatives have shown more crusading spirit. President Ed Dench and Dave Vinikoor, TIM Legal Awareness Committee chairman, have marched in and out of numerous rental offices carrying lists of grievances. Although met with general rebuffs at first, they could eventually boast landlords more than concerned after TIM made good its threats to investigate.

#### The First Step

The main target was the newly built Bluebell Apartments, located off University Drive Refocusing its guns from their former mark, Whitehall Plaza Apartments. TIM bombarded the management with grievances compiled from tenants who complained about leaky roofs, no beds and nonfunctioning garbage disposals.

The most important issue was, of course, money. One charge was leveled at tricky, fine-print leases which allowed Bluebell to raise rents on short notice.

Currently, Bluebell has acted on TIM's suggestions for improvements, and the complaints have decreased. Dench says one of his biggest successes was in getting Bluebell to agree'to its promises for improvements. One promise was to keep rents at their original level with no increases until next year when current leases expire.

Dench can also claim success in a standardized lease, which came out of TIM's work at Bluebell Apartments. Dench explains that a standardized lease "compromises on both sides by fulfilling needs and giving protection to both landlords and tenants." TIM's standardized lease, if and when accepted by every landlord, would make TIM a buffer group between the two parties.

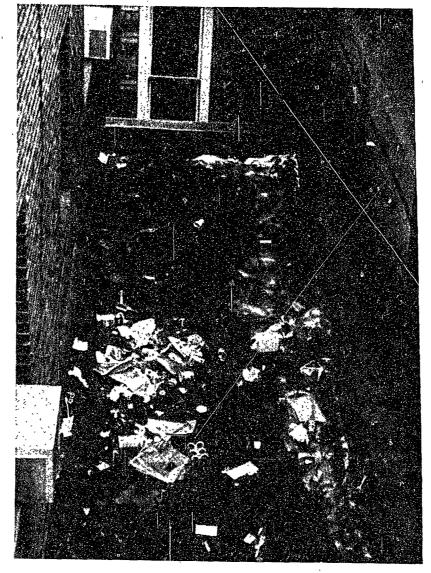

"The lease is a simple one,"
Dench said. "It is easy to understand and lets the landlord and tenant know their obligations right at the start. It would give no single advantage or disadvantage to either one and allows TIM to act as a neutral third party in disputes of any kind. Any questions could be answered; everything would be in the lease."

So far, Whitehall Plaza, an alleged problem area last year, has agreed to the idea. Bluebell Apartments has yet to sign.

Herbert Dean, manager of Bluebell Apartments, said he will agree to a standardized lease "if it does meet the requirements of both sides." He said he

BROKEN GLASS punctuates rows of windows in one recently constructed apartment building. Tenants have complained about the drafts and danger involved, but the landlord has not yet felt the same way.

TRASH AND GARBAGE fill an empty lot behind apartments off College Ave. One tenant calls it State College's answer to backyards in the Bowery.

and Dench are working on an agreement.

"Things aren't perfect yet,"
Dean added. "But TIM has been
a help in smoothing out problem
areas."

Despite these most recent TIM victories, housing conditions still remain far from perfect. Collectively, housing complaints and explanations from landlords point up an old vicious circle.

According to those who have complained the loudest, downtown landlords have a captive service and functional, if not aesthetic surroundings for \$275 per month," one student adds.

A look at the State College housing situation shows a fairly even dividing line between legitimate and illegitimate complaints from both sides.

State College apartments rank with apartments found in most towns anywhere—there is the usual sprinkling of slum dwellings, apartments in private homes, and newer apartment buildings. What makes the sit-

## Despite the most recent TIM victories, housing conditions still remain far from perfect.

real estate market, and the less ethical ones are encouraged to exploit it by the small knowledge students have of real estate matters

Most landlords, student tenants say, feel that students aren't responsible tenants and will destroy expensive furnishings so they lease apartments with only essentials. Other landlords see a quick profit in leasing an old room, basement or attic. Students are often pushed into accepting when their choice of apartments offers no suitable alternatives.

Other students, a little luckier, manage to move into the newer and more nicely equipped apartment buildings, most constructed in the past five years. But many of these tenants complain that their appliances don't work, and the landlord, always around when the rent is due, can't be found when he's needed.

Furniture is fragile—drawers pull off the coastings with little effort and the arms on chairs break when someone leans on them, they point out.

Other annoyances include television cables and water pipes that play a game of on and off usually at the worst possible times; general deposits disappear when the student is ready to move out and collect.

#### 'Normal Inconveniences'

Landlords brush off these complaints as normal "inconveniences" of all apartment living, no matter where. In return, students have retaliated by destroying what's left of their places and plaguing the landlord with small complaints.

What students consider good conditions and what they and the landlords can afford to provide vary.

Some landlords say that students, as well as any other tenants, have to accept "the facts of apartment living." As one landlord says, "You can't expect a penthouse for \$50 per month. It's as simple as that."

"But you can expect decent

uation in State College different is the predominantly high student proportion of State College residents. Those residents that call State College their permanent home live in houses, with apartment rentals constituting a small percentage of permanent residences. That leaves students the apartments in town where landlords presently have waiting lists of eager new tenants anxious to move from dormitory to one, two and three room apartments.

Waiting lists and eager new tenants usually mean that students, although they will complain about unsuitable living conditions, won't move out.

#### Reasons and Results

The reason? They can be easily replaced by new, inexperienced tenants which makes their threats to move out somewhat impotent. More importantly, there is usually nowhere else to go.

The result? Many students say they are a captive market at the hands of callous owners in a modern version of the villainous black-hatted landlord foreclosing the mortgage on the poor, but innocent tenant.

One landlord says the story is not this onesided. Leonard Grove rents about 40 units to 300 people on S. Sparks St.

"Some fellows can't be pleased no matter what you do for them," he said. "But, I would say the majority of students are content," he added.

"Many of these guys rent a cheap place and want the same conveniences of those paying twice as much rent," he went on. "When the conveniences and luxuries in an apartment increase, so does the price. That's a simple economic fact."

TIM hasn't agreed with Grove's opinion that most student tenants are satisfied, nor has the Bureau of Consumer Protection, a division of the state Department of Justice.

Representatives from the Bureau came to State College

## A Long Fight For Improvements And a Hard Push For Changes

to assist Vinikoor in problems of rent escalation clauses and security deposit withholdings. The Bureau is still involved in some cases.

Along with the controversy over conveniences, rents and money, runs the more important and dangerous question— do old, run-down apartments and buildings compose a serious safety hazard?

Eugene Guydosik, State College building inspector, says most landlords do comply with safe housing requirements, but students do not. "They'll (students) leave refuse and rubbish piled in their kitchens and sometimes in the hall. This is a serious fire hazard as well as a sanitation problem," he said.

#### **Fraternities**

About 2,800 of the approximately 3,000 fraternity men live in the 55 fraternity houses both on and off campus. Many of the houses date from the 1920's and 1930's and present, at worst, possible fire hazards due to old wiring.

Fraternity house complaints are outside TIM's jurisdiction, falling under the authority of the Interfraternity Council. IFC President Larry Lowen says his organization keeps a close check on fire safety violations.

His report so far lists only minor infractions at a few houses. The record is good; a fire at Sigma Nu fraternity which took one life two years ago and one at Alpha Gamma Rho last summer have been the most recent cases, but Lowen added that the overall picture shows little difficulties.

The University has played a silent role in the story so far. Charles L. Lewis, vice president for student affairs, said that the University's policy to not engage in any "inspection or review of off-campus housing" is the "general policy of universities across the country."

"The issue involves a basic fact," Lewis said. "Does the University have the right to step outside of campus into conflicts between landlords and students? This is a private relationship which the University really should not get involved with."

And, in an era when "in loco parentis" is repugnant to many college students, Lewis' statement is hard to argue. By stepping into downtown living disputes, the University may be getting a foot into the door that could lead to more University regulation of student affairs. On the other hand, others argue that the University, which can never competely step out of student affairs, should step into this realm where it can use its influence for the best.

TIM President Ed Dench

said he would like to see the University involve itself in the downtown situation. "At least, the University should make a stand one way or the other," he said. "So far Penn State is completely noncommital; it won't say, 'no, we will not get involved,' or 'yes, we'll investigate, too'."

Dench said other universities he's contacted do have an interest in the downtown living conditions of their students.

Michigan State University, for example, controls off-campus living through approving apartments and other living quarters before students move in.

But, the University of Pennsylvania, whose out-of-town students must find rooms in the older West Philadelphia location of the campus, has no direct control. A student composed council, however, has implemented a standardized lease and places students in apartments that have met all state and local housing codes. The council's success has been high.

Dench added that he is pleased with TIM's results despite the lack of help from the University. "We've proved that the University is not wholly necessary in help of this kind," Dench said. "And we've given one good argument against in loco parentis by the results of our work."

#### **TIM Success Story**

The results of TIM's work show a success story in improving town living. Dench says that safeguards include a hoped for "100 per cent acceptance by all landlords of the standardized lease and an awareness, respect and fear on the part of landlords that there is a strong group backing tenants."

"As soon as landlords realize this," Dench said, "they'll refrain from taking over students. We hope to act as a deterent so that we can stop problems before they start from now on."

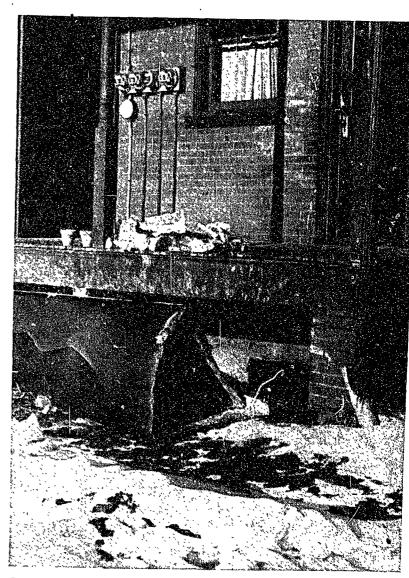

TIM has also become an affiliate of the Centre County Realty Board whose members include 40 to 50 per cent of all landlords. Dench said he believes this will also make TIM a stronger reckoning group.

"We're pleased on a couple of accounts," Dench said last week. "We've done everything we wanted to do."

Does the future look bright? "Well, we won't fall back," Dench says. And, he promises more work.

If TIM's accomplishments do work as planned, State College should have a model student-populated downtown area.

"Landlords and tenants both satisfied. What more can you want than that?" Dench asks.

WHAT MIGHT PASS as the look of Appalachia is one porch in a string of old. run-down houses on W. Beaver Ave. Conditions inside show little difference.
