**England Proposes Stricter Drug Penalties** 

**England Proposes Stricter Drug Pendities** LONDON — Prime Minister Harold Wilson's government has decided to seek new powers for a nationwide crackdown on drug pushers and underground drug makers, informed of-ficials said yesterday. A comprehensive new bill to toughen Britain's spotty system of producing, distributing and prescribing drugs is in preparation and will be announced by Queen Elizabeth II in her speech from the throne opening the new Parliament Tuesday. The over-all aim is to strengthen and rationalize existing measures for the control of the country's ever-increasing drug

measures for the control of the country's ever-increasing drug menace. This threat has assumed big proportions with revolutionary developments in drugs that work on the central nervous system. Informants estimated the number of new drugs being manufactured may run into hundreds and includes stimulants, depresents transmitting and hollweingorges

depressants, tranquilizers and hallucinogens.

#### Viet Cong Position for Possible Offensive

SAIGON - U.S. infantrymen screening infiltration routes northwest of Saigon engaged North Vietnemese soldiers in two

northwest of Salgon charged North Vietnenese Soliders in two running battles yesterday. Field officers said it appeared that North Vietnamese ar-my units which have been holed-up in Cambodia are moving back into South Vietnam, possibly positioning themselves for the kickoff of a winter-spring offensive next month. In Saigon, the U.S. Command said that American casualties for the past week remained near the three-year low, with 78 Americane killed in action. It was the fourth straight

week that fewer than 100 Americans died on the battlefield. South Vietnamese combat deaths exceeded the U.S. total for the 23rd consecutive week, with 301 government troops

killed. A U.S. spokesman also said that a GI captured 4½ months ago by the North Vietnamese made his way to an allied land-ing zone Monday.

#### Arab Guerrillas Attack Lebanese Posts

MIDDLE-EAST — Arab guerrillas from Syria swept into neighboring Lebanon yesterday, attacked three border posts and abducted 4 frontier guards in retaliation for a Lebanese army crackdown on the commandos.

Apparently carried out with Syrian cooperation, the raid was bigger than any launched by the guerrillas against Israel since the end of the 1967 six-day war. Al Fatah, largest of the Arab commando organizations, claimed responsibility for the forays and promised to return the hidrograd

the kidnapped men.

"Today's operations were only a warning to Lebanese authorities," Al Fatah said in a comunique from its head-quarters in Damascus, the Syrian capital, "The Palestine revolution demonstrates its ability to take any measure it deems fit to defend itself and escalate its operations."

#### The Nation

#### Nixon Seeks Merchant Marine Changes

WASHINGTON — President Nixon proposed to Congress Thursday a 10-year, \$3.8-billion Merchant Marine program to "restore this country to a proud position in the shipping lanes of the nucled" of the world

It represents an increase of \$1 billion over the present rate

It represents an increase of x such as the program, of spending. Administration spokesmen, in explaining the program, said it changes the methods of ship construction and operating subsidies and is designed to produce 30 new ships a year when the program gets in full swing in the third year.

Mayoral Races Highlight November Elections Mayoral races in New York City, Cleveland and Detroit, and races for governor in New Jersey and Virginia will highlight this year's Nov. 4 elections. Voters in two states will decide on whether to lower the minimum voting ages to 19 in Ohio, and 18 in New Jersey. In North Carolina each of the state's 100 counties will hold a local option vote on a proposed 1 per cent sales tax. In New York, Mayor John V. Lindsay is in an uphill strug-gle for re-election and in Cleveland, Mayor Carl B. Stokes, the first black to win election as mayor of a major U.S. city, also is in a tight race.

first black to win election as mayor to be a straight race. Detroit's mayoral election has county Sheriff Roman Gribbs, who is white, running against county auditor Richard Austin, who is black, in a close contest to succeed Jerome Cavanaugh, stepping down after two four-year terms.

#### Military Rejects Unilateral Cease-Fire

WASHINGTON — Top U.S. militarerai Cease-Fire WASHINGTON — Top U.S. military leaders oppose a one-sided cease-fire in Vietnam on grounds it would enable enemy forces to move unopposed into positions from which they could strike serious blows at American units. Senior generals also dislike the idea of a mutual cease-fire, saying they have no faith that the enemy would keep its part of the agreement. These uniformed leaders contend the enemy's record justifies their misging.

on campus.

Some students walk in g through the Hetzel Union Building yesterday merely cast a curious glance in the HUB Reading Room. Others came in, looked around helplessly and walked out. But some sat down and talked face-to-face. freely with faculty members who responded frankly. The occasion was an open meeting of students and facul-ty members and members of board which was passed unanimously. "If the students come up with a decent pro-posal I think it will pass. But I hope students will ask us for help, only this time on a volun-tary basis," Lewis said.

Lewis Made Mistake

Lewis Made Mistake Referring to University ac-tion on the sale of the Garfield Thomas Water Tunnel, an un-derground newspaper, Spring Term, Lewis said that he thought Charles L. Lewis, vice president of student affairs, had made a mistake by ban-ning the publication from campus. ty members and members of the University Senate in the College of the Liberal Arts. The order of the day was communication. Pete O'Donnell, president of the Liberal Arts Student Coun-cil expressed the general feeling of the people at the meeting. "It wasn't so much what the people were saying that was important. It's the fact that students and faculty eat down and communicated

campus. "My objections to the Water Tunnel are on a purely literary basis, he added.

Lewis commented that he had supported the open meet-ing sponsored by the Liberal Arts Student Council last spring and he was pleased with yesterday's meeting.

fact that students and faculty sat down and communicated how they felt on different issues, be it the Vietnam War or the pass-fail system." Senate Chairman Attends Discussions broke up into groups of approximately ten students and a faculty mem-ber. Notable among faculty members present was Arthur O Lewis, chairman of the University Senate. Students speaking with Lewis showed interest in the abolishment of Rule W-20 which regulates the sale and distribution of all publications on campus. yesterday's meeting. "The discussions gave stu-dents a chance to talk to peo-ple who theoretically have some influence. I probably have more access to student opinion than most faculty members, but today confirmed much of what I felt to be true. For instance it showed me that W-20 is by no means a dead issue and that the students want us to consider it again."

Merrill Noble, head of the psychology department, spoke with students on the problems of the large university. In Lewis said that he had urged the senators to "do something about the rule." He added that he favored a student

## response to questions about the "publish or perish" con-troversy, Noble said that rescarch is "usually a good thing."

He explained that in many fields such as psychology it is neccessary to transmit in-formation to large numbers of people. Noble urged students who

**USG** Approves **Easing of Fines** 

By PAT DYBLIE and BILL BROADWATER Of The Daily Collegian Staff

Guidelines to ease campus traffic fines and remove many evening parking restrictions were approved by the Undergraduate Student Government last night.

The guidelines, presented in the form of a bill by the USG executive, will become effective Winter Term and will apply only to undergraduate students.

Students will receive a warning on the first violation and will be subjected to successive fines of \$2, \$2, \$5, \$5 and \$10 according to the bill. Violations will be recorded on a term basis and a warning will be issued for the initial violation of each term.

#### No Present Warning

Present regulations require fines of \$1, \$3, \$5 and \$10 and are compiled on a yearly basis with no warning provision.

Students will be required to report violation tickets received to the Traffic Violations Office within two class days after the date on the ticket. A \$1 late fee will be imposed on both warning tickets and subsequent tickets if a students fails to report within the required time.

The bill also opens the lots around the Ritenour Health Center, Pattee Library and Sparks which are not designated as "yellow" on the University traffic map to student parking between 6 p.m. and 2 a.m.

Passage of the bill was encouraged by USG President Ted Thompson who helped compile the adjustments last summer with Ralph E. Zilly, vice president for business, Raymond O. Murphy, dean of student affairs and officials from the violations office. Thompson also reported to Congress that most of the proceeds from traffic fines are turned over to the USG Scholarship Fund.

Congress voted to refer to USG's Student Affairs Committee a resolution requesting the University Senate to recognize spokesmen from

the Black Student Union and the Association of Women Students when deliberating problems relating specifically to those groups.

Interfraternity Council President Harv Reeder questioned if the resolution would mean "throwing out the window the fact that we ask USG to be the sole voice for the entire student body." Reeder said that he felt recognition of the two groups might mean "further fragmentation" of students.

Nina Comly, AWS president, stated, "I support this (the resolution) because we are a special interest group." She said USG represents the student body "as a whole" and cannot specifically accommodate interests of women and black students.

"Doesn't Exclude USG"

"The resolution doesn't mean to exclude USG but rather include groups to lend expertise to certain problems," according to Terri Borio, USG East Halls congresswoman.

Winners in this week's congressional elections were certified by the USG Elections Commission and inducted into Congress by Harry Hill, USG Supreme Court Chief Justice.

Two West Halls candidates, one of whom was seated on Congress, charged to the Elections Commission that Ray DeLevie, winner of a West Halls seat, had terminated his residence hall contract and moved to an apartment before being certified.

DeLevie was certified after a pre-meeting grievance hearing with the Commission but his case will be taken to the USG Supreme Court on Monday. Chief Justice Harry Hill said that impeachment proceedings will be taken by Congress if Dellevie's alleged move is found unconstitutional.

Congress approved a recommendation by Thompson that Tom Ritchey, former East Halls congressman, be appointed Parliamentarian. Hill resigned his post as Parhamentarian at Congress' initial session Fall Term "to devote more time to my dutics as Supreme Court Chief Justice."

## YAF Not Supporting Palladino

**But Will Circulate Letter** 

The Young Americans for Freedom portunity to support it by signing their said last night that they do not support names under it. Dean of the College of Engineering Nun-YAF members agreed to participate zio J. Palladino's letter to the editor in the model United Nations which will

occur on February 19-22, in Chambers. They considered sending delegates to epresent such countries as Australia. Japan, the United States and Yugoslavia.

There will be a \$5 fee for each delegation (or country) entered, and three representatives will be sent for each delegation.

This model UN will meet to discuss international problems (such as the Middle East and Rhodesia) and try to seek resolutions for the situations. It will

follow a basic format similar to the rules and procedures of the real UN.

YAF members also plan to send a weekly newsletter concering the activities of their organization to its members. The name they chose for the publication is "The Pipeline."

Allan Montross, YAF chairman, said that they were planning some activity for the Nov. 14-15 Moratorium, but no definite plans could be revealed until next week.

Montross also stated that some profit had been made from the YAF table in the HUB, and that new supplies would have to be ordered.

Noble urged students who are dissatisfied with a course to speak to the professor and offer suggestions or even to write a letter. After the meeting O'Donnell commented that the senators did seem receptive but that the

Senate, listens to a student express his opinions at an open meeting of students, faculty members and members of the Senate held yesterday in the HUB.

part of the agreement. These uniformed leaders contend the enemy's record justifies their misgivings. They recall that the United States halted all bombing of North Vietnam nearly a year ago, after reaching what were thought to be "understandings" with the North Vietnamese. These understandings, as outlined by U.S. officials at the time, were that the North Vietnamese cities and stop violating the demilitarized zone. On that basis, the Joint Chiefs of Staff supported President Lyndon B. Johnson's decision to stop the bombing in the north. But the shellings continued and the enemy kept violating the DMZ.

#### The State

Mortgage Rate Is Lowest in Nation HARRISBURG — The laws of economics and the laws of Pennsylvania have collided with a crunch that is crushing the housing market across the state. And, as usual, the first victim is the little man. In this instance, it's the average family out shopping for a mortgage to buy a new or used home

to buy a new or used home.

The reason, according to mortgage lenders, is that Penn-sylvania's mortgage interests ceiling of 7 per cent 6 per cent plus a 1 per cent premium is the lowest of any of the 50 states,

plus a 1 per cent premium is the lowest of any of the 50 states, the District of Columbia and Puerto Rico. Only two other states, Kentucky and North Dakota, have a 7 per cent ceiling. Five states have no limit at all; Rhode Island has a 21 per cent ceiling and more than a score of other states have rate maximums ranging from 10 to 12 per cent. And inflation has made it more profitable for lenders — banks and savings and loan institutions — to invest money in other types of loans and securities where they can earn more than 7 per cent than 7 per cent.

#### House Opposes State Tax Proposals

# HARRISBURG — The House Republican Policy Com-mittee issued a position paper yestorday warning current state spending proposals would cost the commonwealth S300 million in new taxes in the next fiscal year. This would be on top of the \$534 million in new revenues

the programs are expected to require this year, the paper said.

The House GOP estimates were considerably higher than Gov. Shafer's own projection in the state's five-year budget proposed in January. In that document, Shafer estimated the "mandated costs"

In that document, Shater estimated the "mandated costs" and expansion plans for his program would run some \$150 million higher in 1969-1970 than in the current year. But the House Republicans said their projections, based on new estimates and information, indicate the necessity for ma-jor cutbacks in proposed spending this year. The paper, looking at what it referred to as the "political realities," stated: "There is absolutely no possibility of enact-ing such a huge increase in an election year."

# **On Advanced Mark 48 Torpedo**

Ordnance Research Lab Works

#### By STEVE SOLOMON Collegian Staff Writer

Copyright 1969 by Steve Solomon

(Editor's Note: This is the sixth of a seven-part series on U.S. Department of Defense-sponsored research at the University. The concluding article, which will appear Tues-day, will be an analysis of the Penn State-Pentagon relationship.)

Several years ago, State College held a parade and requested officials at the Ordnance Research Laboratory to build a float with a torpedo mounted on it. "We threw together some scraps and put it on a truck," Richard E. Bland, associate professor of engineering research at the ORL says. "It didn't even have an engine in it. But nobody knew the difference. Ever since, though, everyone has had the idea that we made torpedoes here."

Of course they don't make torpedoes in the ORL. But they do research and development which enables Westinghouse to make torpedoes.

Westinghouse is now building the Mark 48 Westinghouse is now building the Mark 48 torpedo, the most advanced torpedo weapon yet conceived by this country and perhaps the world. It is faster than any nuclear submarine, much faster than any torpedo. It dives the deepest of any modern weapon. It has complex acoustic homing and guidance systems which will assure it of a kill miles away.

And it was designed and synthesized by scientists at the Ordnance Research Laboratory.

#### Intimate Partner

The ORL, with a staff of about 600 in a complex of buildings on the west end of cam-pus, is an intimate partner of the military establishment; about 98 per cent of its research effort goes into antisubmarine warfare. Its emphasis is on problems of acoustics—the science of sound—and hydromechanics—in this instance the study of bodies moving through water water.

Besides playing lead in the Mark 48 cast, the Laboratory has also carried out, in its 24year history:

"preliminary" studies into the anti-submarine rocket (ASROC), which is launched from destroyers or other fleet ships.

-"preliminary" studies into the submarine rocket (SUBROC), an underwater-to-air-to-underwater antisubmarine weapon which can be launched by a nuclear submarine.

--pioncer investigation into underwater-to-air missiles, which started in 1947 and solved some of the problems of missile flight through both air and water. Its application today: the

nuclear-tipped Polaris missile, perhaps American's most important deterrent.

legian.

--research into hydrodynamically shaped submarines. One of the Laboratory's con-tributions was the design of the "USS Albacore," whose successful hydrodynamic properties were incorporated into the Navy's modern nuclear flect.

modern nuclear neck. —design of the first cavitation-free pro-peller which can move a torpedo 50 knots at 50-toot depths. (Cavitation is the vaporization of water and the formation of small cavities in the low pressure regions produced by fast-moving water rushing by propulsar blades.) In addition to ships, such work contributes to the complex summum operations in missile propulsion pumping operations in missile propulsion.

-the development of new propulsion systems for ships and weapons. These systems include rotors of wide speed ranges, including the shrouded propeller, pump-jet, and multistage blading.

-designed electroacoustic transducers for the homing systems of most torpedoes developed during and since World War II, including the torpedoes Mark 21, 28, 31, 34, 37, 44 and 48. (Transducers are the elec-tromechanical devices in sonar systems which receive or generate sound.)

-done noise measurement and analysis of Navy ships and "other craft" (most probably enemy ships), of torpedoes Mark 35, 37, 45, and 48 and of sea life. Such studies are done so that sea noises may be identifiable from mechanical noises, and so that American ships may be able to mask their own sounds to prevent detection hostile craft.

All of this, according to Elhert F. Oshorn, vice president for research, is "small potatoes." And it is, if the ORL's budget of ap-proximately 88.7 million for the current fiscal year is compared with the \$120 million or so lavished by the Pentagon upon the Instrumen-tation and Lincoln Laboratories of the Massachusetts Institute of Technology. But even on such a miniature monetary scale, the presence of the military on the University cam-pus is as troublesome as at Cambridge. where pus is as troublesome as at Cambridge, where a special review panel was formed earlier this year to study MIT's relationship with the Pen-

Ironically, the ORL's origins go back to Cambridge, Mass., in the summer of 1941, when a small research group explored improv-ed submarine detection and location systems for the Navy. The entry of the United States *m*-to World War II led to a rapid evolution of the research team into the Harvard Underwater Sound Laboratory a year later, where the re-quisite manpower and monetary resolve was

translated into the crucial acoustic homing torpedo, which helped sweep Germany off the seas.

In 1945, after the war, the laboratory was divided into two groups, with the acoustic hom-ing torpedo team moving to the University un-der Eric A. Walker, now president of the University University.

University. Under contract with the Naval Ordnance Systems Command, the ORL's tacilities have grown with its budget; the main facilities at University Park include the ORL Main Laboratory, the Smithfield Building and the Garfield Thomas Water Tunnel, the largest operating high-speed water tunnel in the iree world and the titular inspiration for a campus underground newspaper underground newspaper.

The ORL also has field test stations at Key West, Florida, florida, and Keyport.

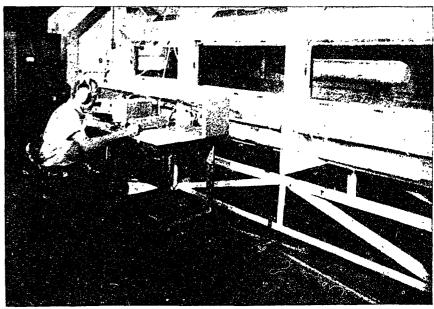

Washington, and a calibration station at Lake Black Moshannon, about 20 miles northwest of University Park, Research and experimental stages are undertaken at the University and the testing at one of the three field stations.

#### Measure of Control

ORL officials say that research project proposals are conceived in the Laboratory and forwarded to the sponsoring agency (Depart-ment of Defense), as with all other research on campus. This independence, according to of-hicials, prevents the ORL from becoming a satellite of the Pentagon, and maintains a measure of civilian control and restraint.

"Essentially," said George F. Wislicenus, director of the Water Tunnel, "this Laboratory

#### Editorial Opinion

## W-20: Repressive Rule

UNIVERSITY SENATE rule W-20 states that the University can ban from sale or distribution any publication which it deems "unacceptable." It does that and a lot more.

The controversial rule, which grew out of the fury over the Administration's banning of the first issue of the Water Tunnel last winter, may soon be challenged by none other than the normally placid Commonwealth Campuses.

The Ogontz Campus News, the stu-dent newspaper at the Philadelphia area campus, has taken the first step in what will hopefully be the end of W-20.

THE NEWS, ALONG with some members of the faculty at Ogontz, has asked the Senate to abolish the rule.

Indications are that support is increasing, slowly but surely, from other campuses of Penn State. University Park, the main campus, should be in there fighting, too.

The reasons for abolishing the rule are clear. Foremost, the University does not have the right to ban the sale or distribution of anything on this campusno matter how obscene or treasonous.

THERE ARE STATUTES upon statutes, and the U.S. Constitution, which have been written to determine who can ban what.

When W-20 states that the Univer-sity can ban any publication "which in of a "true university."

its opinion violates the civil libel laws. it is stepping on ground that is reserved for the courts of this nation, not the universities.

And when the Supreme Court often has difficulty determining civil libel suits, it is doubtful whether the University could do so. Unless, of course, the Administration plans to enforce its pre-judicial views, similar to its tactics in the banning of the Water Tunnel.

IN ADDITION, it is nearly impossible to determine what the standards of the University are: "The University shall ban on its campuses any publication which in its opinion is incompatible with the University's standards.'

Whose opinion constitutes the "Uni-versity's standards"? The Board of Trustees? President Walker? SDS?

Hardly; a look at the Board of Trus-tees alone shows that even those men and women probably could not decide unanimously on such an issue.

When The Ogontz Campus News called on the other Commonwealth Campuses to print an objectionable word, they were doing the entire University a service.

IT IS ONLY WHEN antiquated, naive and repressive rules such as W-20 are abolished that the Pennsylvania State University will grow to the stature

## Smile, Wave the Flag, Cough have a friend somewhere who reported you to the local board."

By JONATHAN RICH Collegian Columnist

There is something of a bitter irony There is something of a bitter fromy in being called for a pre-induction physical on Moratorium Day, but who was I to protest the inconvenience of the 120 mile ride home before arising at 5:30 a.m. to take a bus trip to dis-cover that I was healthy enough to be shot at by someone other than the American Legion.

"What is a little inconvenience," I thought. "What kind of American are you? Hadn't my uncle and grand-father served well in World War I, hadn't my father almost been shipped to Alaska in World War II, hadn't General Hershey almost seen combat in his 89 year Army career?" I searched my soul, Yes, I would take the physi-cal. I would endure all manners of indignity. I would give a blood sample. I would urinate in a tube. I would run in place on a cold floor while a physi-ciar, pressed his dry ice stethoscope against my chest. I would cough. I would also flunk the physical, my eyes are terrible. are terrible

are terrible. I tucked the papers, all signed by men proven in the eyes of their pro-fession (doctors, optometrists and check forgers) in my pocket. I made a mental note to myself that no matter what happened this sunny Oct. 15, my atti-tude would be one of detachment. My primary task, I decided, would be to chronicle the experiences of the day, compare notes with Alice's Restaurant and get the word to all those under-graduates who look ahead with an-ticipation to the day when the smiling sergeant says, "This physical you men are taking today won't mean anything for a little while, unless sometime to-day you men take it into your heads to step out of line. Then it will mean something. You'll be called for induc-tion immediately. Do I need to say anything else?"

The spirit of the bus picked up as old friends recognized each other, George Geib and I practiced singing the Canadian National Anthem which is easier to sing than our National Anthem

but harder than "Everybody's Going to Ginos" which we had fun singing.

Some of the less intelligent on the Some of the less intelligent on the bus occupied themselves by looking in-to the sun as it came over the horizon. Others asked the driver if he wanted to take the day off and drive to the shore, but he had a job to do he said so why didn't we look at the legs of the girls in the cars we passed. "It's a good angle," he said.

a good angle," he said. Because the New Cumberland Army Depot is there, Harrisburg will never need to fear a ground attack from Richmond, Over the entrance gate the arch reads, "Arsenal For The Brave." Underneath the arch an old man rises from his chair to sneer at inductees or peek into cars with female occupants. These he checked for cards, thighs and other interests concerning the national security. I mention this, only because the bus driver spent the day at the gate.

Our bus beat the two other bus loads by 50 minutes, which gave us all plenty of time to think about our homes, families and other loved ones. I was surprised by the number of fel-lows who talked of escaping to Canada. Soon the young men from Huntingdon and Perry Counties arrived and we were set for one of the biggest days of our young lives. our young lives.

First, we filled out forms. When asked to list criminal offenses in a seven by seven space, some guys asked for an extra page. One interesting lad asked how he should list a robbery he'd be charged with after he returned from the physical.

"Did you do it?" "No, sir." "Don't list it" Now that's what I call faith in the American way.

"Oh. I did that, sir. The card says to report any change in status to the local board."

I misread the subversive list and almost listed myself as an acquaintance of the German-American Band, but dis-covered somewhat sadly that it was

Then it was mental test time, we were told that under new Army regu-lations we only needed a score of one out of 100 to pass the mental test. I did the first five questions and asked if I needed to do anymore. Nobody loves

The physical part of the test wasn't bad at all, even if the equipment was. During the hearing test a plane flew overhead and drowned out the sound of any tone which might have been coming through the headphones.

thorough. Anybody who has ever gone to summer camp has had to endure more in the way of an admittance physical. Two of the three MDs didn't show, which might have influenced that day's testing. The man counted my toes, asked me if I wetted the bed or wolked in my clear

my loes, asked me if I wetted the bed or walked in my sleep. By 12:30 I was done. Here the worst part of the day started. While everybody who didn't have an X-ray or whose doctor had died within the year went back for a more thorough examination, 100 of tomorrow's leapers sat in a room watching the recruiting

examination, 100 of tomorrow's leapers sat in a room watching the recruiting sergeants listening to the World Series. Four of us spent two hours throwing rocks at a flower outside the confines of the Nittany-like structure. I finally crushed the flower in frustration. When all the rocks were on one side of the compound, we threw them back. Finally at 5 the doctor and the recruiters gave up and sent us home.

The test was neither insulting nor

Then it was mental test time. We

a wise ass.

## **Theatre Critique**

'Hamlet' and 'Rosencrantz': Disappointing and Delightful

BY BEVERLY WYATT Collegian Film Critic

In contrast to Friday night's slow presentation of "Hamlet," the American Theater Productions' version of Tom Stoppord's "Rosencrantz and Guildenstern are Dead" provided fastmoving entertainment, I'm sorry to admit that this production of "Hamlet" disappointed me. Perhaps the company had an off night, perhaps the stage was awkward, perhaps a lot of things; but a professional repertory company is sup-

posed to de-Rosencrantz liver, no matter what the and circumstances. According **Guildenstern:** to the Artists Series bro-'Audience Was chure, "the critics gave Left Utterly this company and Laughingly rave reviews -'superb pro-Behind by duction . . . coherent, co-Peculiar Logic'

hesive, lucid and exciting."" I would like to know where all those dazzling qualities were Friday night. I am inclined to attribute the general lack of contrast, pace and script to sloppy directing rather than to sloppy acting. It is generally assumed by actors that the manner of line delivery tells greatly in its effectiveness ... I have never seen more professional people deliver lines 'on the run'.

I lost the conscience of the king, the rottenness of Denmark, and several other statements of affairs to an incoherent mad dash off the stage. Pace is picked up between the lines, not between the scenes, or the words. I also objected to the static posing of the players, the lack of definition of transitions and passions in many of the speeches, the need of Laertes (Harvey Solin) and Ophelia (Margo Ann Berdeshevsky) for voice lessons, and the interpretotion of the characters of Hamlet, Ophelia, and Claudius. Despite my many objections, I found several moments of the play captured the passion and high tragedy of Shakespeare's script, as well as his raucous humor.

Scenes that stand out in my mind include Ophelia's mad scene, the gravedigger encounter, though I greatly missed the second gravedigger, the excellent portrayal of Polonious by Frederic Warriner, Laertes' distress over Ophelia's broken will, the conflict between Hamlet and Laertes at her grave. Although I disagree with the interpretation of Ophelia - I somehow see her altogether more meek and forceless when sane, more bewildered and pathetic when mad, rather than the throaty amaze of her hysteria between herself, Polonius, and Hamlet, and the raucous distraction of her later madness - I was greatly impressed with Margo Ann Berdeshevsky's portrayal. Although she was not Ophelia to me, she was a very real person gone mad, and the horror of it came through. I didn't feel that Robert Burr took advantage of his speeches for their potential of passion and revelation of character in his interpretation of Hamlet. Perhaps the speech Shakespeare has Hamlet deliver to the Player had something to do with it. He advises that over much show of ranting and raving is as bad as not enough. Especially in his soliloquies of suffering and self-torture, I think Mr. Burr left out a great deal of torture, so that Hamlet's later adoption of distraction makes him appear offhand somehow Hamlet just didn't convince

me of his own tragedy. My objection to Claudius was that he made himself too one-sided, so that the soliloquy before prayer appeared ludicrous ... 1) no indication had been given that this man might even possess guilt, 2) his address to the audience as an admonishing father to a rather dumb child completely robbed an excellent speech of its qualities of inner examination and revelation of character.

In the company's production of "Rosencrantz and Guildenstern are Dead" I found a sense of rapid fire pace, humor and interweaving of plots that delighted me, at least in comparison with the previous night's show. Perhaps Guildenstern (Clebert Ford) mushed and mouthed his speech a little, but Rosencrantz (John Church) was unforgettable. his characterization precise, sensitive and self-possessed.

There were moments when the lighting people seemed as confused as the two courtiers: and there were moments when the audience was left utterly and laughingly behind by the peculiar logic of the two men; but there were also moments of realization, of sensitivity to the discovery of death and fear as in the two letters discovered by these two very real and bewildered men. It is here that Tom Stoppard's script transcends itself, and goes beyond the satiric and bawdy. To watch Rosencrantz cry out against death. to feel Guildenstern's bewildered distress left me clutching for more things to laugh when I suddenly knew Stoppard at, wanted me to double up with agony instead. The experience was like watching Mercutio die.

The agony of Romeo's young friend at the hands of Benvolio perfectly illustrates my reaction to the profoundly serious death that constitutes "Rosencrantz and Guildenstern are Dead." Behold, the clown:' laughing, witty, satiric...dying meaningless, without compassion, pity, or even suitable reverence. Saturday night the audience laughed and applauded, and I watched them become Mercutio's jeering gang of friends, totally unaware of the struggle with ultimate death before them.

As for the rest of the matter: the bawdy humor that escaped an audience unfamiliar with Elizabethan double entendres Friday, found just appreciation Saturday night, especially when the troupe of actors was suddenly 'revealed' as a troop of exhibitionists. Robert Burr's role of the Player provided the catalyst for the action of the play, he being the only character who knew what to 'do' in the rotten state of Denmark. The brilliance of the play in its wit and pathos was well portrayed but owes its presence to an excellent playwright more than to its actors, or to the appreciation of its audience.

'If only there'd been a Vietnam moratorium five years ago . . . "

Letters to the Editor of The Daily Collegian

No Selection Until Function and interested faculty organizations have shown their willingness to participate and make use of

for me to tell you what those "protesters" do not know. They are the ones who are misinformed and know to fe what I and the half million mere and know to fe what I and the half million mere and economically. For instance third of all neople in the st third of all people in the states of California, Con-necticut, Kansas, Nevada and Washington presently are employed in defense work. Also, the time honored notion that war brought us out of the Depression and has since kept us from sliding back into one. The "Report From Iron Mountain" says this is because funds for war can be used ar-bitrarily by the government, without consent of the people, to stabilize the economy as the govern-ment downer processor. ment deems necessary.

TO THE EDITOR: Concerning The Office o Student Discussion, we would urge students and faculty members to take another look at this revived vehicle by the name of Office of Student Discussion. Cornell, Columbia, Connecticut and other universities now have similar type offices, and have been used by students with some effect.

As it is now, the Office seems to be primarily tool for the Administration at Penn State. It a tool for the Administration at Penn State. It should be primarily a tool for the students and the faculty. With the support of the various student organizations, and the more significant interest groups such as SDS, WLF, NUC and others, but above all with the student government of the Blacks, the Black Student Union, the Office can be made into a worthwhile enterprise.

One last effort, to make the Office a signifi-cant machinery, will indicate that students are not disenheartened by the slow processes and past evasion by the creators of the Office.

We fully realize that the response so far has been one of mcrely defining the Office's functions, without making it clear that the "definitions" are accepted by the Administration and by the Trustees. The students have made positive suggestions. stions. They have repeatedly indicated support the Office if the Director has some direct influence, some direct input, and some formalized

duties. The committee of four faculty and four students have agreed on these functions. It is now time for the President and the Administration to review these suggestions, and clarify if they want an Office as defined by the faculty and the student

If the defined functions of the Office are not acceptable, the Office should be speedily dropped

acceptable, the Olifice should be speedily dropped from the roster of non-functioning mechanisms at this University. It would be a plague on both the Administration and the academic community. We do not think that any man could reasonably accept the position of a "director" if his Office has not been formally recognized as having a formal function. Student organizations

#### **Concern for Students?**

**Concern for Students?** To THE EDITOR: The temporary housing situation needs a lot of improvement. It's a mess. We all know that. We have managed to cope with it as best as we can. But on the other hand, something's got to be said when being stuck with temporary housing also means one can be pushed around to satisfy the needs of others. Since I was one of the "fortunate beings" to be in-convenienced, the Department of Housing and Food Services assured me every effort would be made to get me in a permanent room as soon as possible. In the meantime, being concerned about my well-being they would do everything to help make our living a c c om m od ation s "... pleasant...wholesome...comfortable, con-venient, and enjoyable.." But this isn't the case. First they put me in the cellar of a dorm with the pipes squeaking away. There is hardly any

ventilation and the radiators don't work. There are six of us crowded into this cubicle with just enough room to climb into bcd without kicking someone in the face. In the morning we find ourselves in a different location than the right before. That's due to the "ball bearings" on the bottom of the stiff cots. Despite these little quirks we adjusted reasonably to the conditions. Then one morning a coordinator calls and tells us to pack our things, that we are moving to another lounge. We weren't even given an option. lounge. We weren't even given an option.

Apparently members of various organizations and the housing department themselves felt our room would be useful for their weekly meetings. They could move us to a supposedly "more desirable staging location" and still be satisfied that they had shown the utmost concern for our well-being. We weren't so sure, but despite our feeling of injustice we looked into our "new liv-ing quarters" anyway. They weren't any better; if not worse! By now the heat and the pipes were fixed and we had made our old room "livable." So, some of us refused to move. So, some of us refused to move.

We told the coordinator we were not going to move. Since there is no written rule forcing us to move from temporary housing to temporary hous-ing in a better stage, there was evidently little she could do. Therefore as a last resort she threatened to have letters sent home to our parents and claimed our rights in temporary housing would be relinquished. What rights? Well, it boils down to our boilt down to reinquished, what rights? Well, it boils down to our being denied any requests for residence hall or roommate next term and we will be the last to be given permanent housing. Now there is a good chance I will be in temporary housing again in Winter term. Are we dolls? Are we deaf, dumb, and blind? It's about time for us to stop being shoved around like a herd of cattle and to speak up.

shoved around like a herd of cattle and to speak up. This sort of threatening, that the ad-ministration can get away with, scares students into complying. It's not our fault that we are in this situation and it's not right to be punished for it either. But, this seems to be the consequence if one holds out. The housing situation has become a game between the officials and us, the new stu-dents. The administration tries to use force in-directly by threatening us. It fails. We win. But have we really won? Didn't they know from the very beginning that they had the power. .the power to do with us as they want? But don't forget the Department of Housing and Food Ser-vices at Penn State is concerned for the well-being of every student here... Bonnee Field (Ist-Computer Science-Huntington, N.Y.)

#### ' To Help Your Fellow Man'

(Editor's Note: The following is from a letter written by S. Sgt. Neil Gross, of the 1st Infantry Division stationed in Vietnam, to Sandra Fein-man, a graduate student at the University. It was written the night of Oct. 14, after he had heard a news report about the Oct. 15 Mora-tarium.) torium.)

Because you're in a college situation, which seems to be the situation which most of the organizers are in, I have finally felt it necessary

know new They are the ones who are instituted and know not of what I and the half million men here have been involved in, I feel now what my father and his comrades felt during the World War II when Nazism was the enemy. Although my ser-vice to our country was forced, I am grateful to be allowed to witness the horrors of our new enemy. No, you know me better, I'm not being "brain-washed." But, rather, my situation has opened my mind and made it more than receptive to the plight of the Vietnamese people. As our tracks roll down the noads of BVN the

As our tracks roll down the roads of RVN the As our tracks roll down the roads of RVAT the children hold out their hands calling, "G. I. num-ber 1, G.I. number 1." It's these children whose fathers were dragged away, under fear of death or retribution by the Viet Cong, and forced to fight for a cause they did not, and never will believe in.

The students of today call themselves more are of the world and the happenings around the rld—never a bigger lie has been said. They world—never a bigger lie has been said. They have shown me only ignorance and susceptibility to the words of false leaders. Or perhaps these young men are only misinformed. But, as with the boy who cried "wolf," they are causing disruption and anarchy which will only lead to the destruc-tion of freedom, one of our cherished principles, in the Republic of South Vietnam.

If you ever decide that it would bring stares and embarrassment to wear the fatigue jacket I have sent you, then it is me you hurt. I, and my buddies, have given our blood to save this coun-try from servitude. Yes, it's a small, insignificant country, 10,000 miles away but, does that make these people any less real? They're very real to me. They're alive and free and struggling desperately to be free forever. Just as we discard-ed the British, they are trying to loosen the ever tightening and strangling bonds of Communism. Corrupt as governments are and can be, these people exist nonetherless. I want so much to come home...But how can I have until I've done my share to help these people." I only hope that the truth (whatever that is) is closer to you. I feel that my country's armed forces, represented by that fatigue jacket, are engaged in a worthwhile task, and aiding the cause of humanity which should be "to help your fellow man." If you ever decide that it would bring stares

fellow man.

Send Supplies, Not Our Guys TO THE EDITOR: Last week's Moratorium brought much criticism from the conservative elebrought much criticism from the conservative ele-ments of our society, as well as praise and ad-miration that the American people could band together peacefully in a just and noble cause. Critical conservatives said it was all well and good that Americans want peace, but they wondered if we would really want to pay the price for peace. They say we naively think we can pull out from Vietnam and reallocate the funds for the bet-tormort of our our country. We olic curving needs

from Vietnam and reallocate the funds for the bet-terment of our own country. We cite crying needs for cleaning up poverty pockets and America, in general, to be magically cleaned up by the billions of dollars wasted on Vietnam. Eric Severeid says that young people always oppose the right things, but they never propose anything good. Our class got together on Moratorium day to see if we could propose something good. Our

Our class felt, after hearing a public opinion poll on the local talk show, that the American peo-ple would not support cleaning up the poverty pockets in America. We felt Americans would selfishly vote for reduced taxes instead. Therefore, we submit a plan which would save the millions of defense jobs and let the government retain the economic leverage it supposedly needs while, at the same time, protect American lives. We say, send the supplies, not our guys.

#### Attention to Courtesy, Detail

TO THE EDITOR: I have been reading with interest Steve Solomon's series on defense-related activities being carried out at the University. On the whole, I think the presentation has been balanced and definitely instructive.

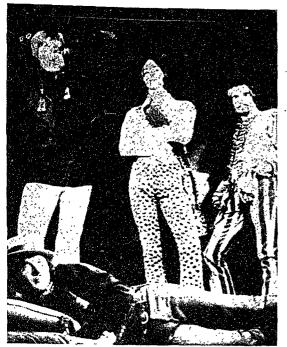

I do wish to say a few words about the article in the October 22 issue of the Collegian, insofar as my own association with IDA is mentioned.

my own association with IDA is mentioned. Mr. Solomon's comments would have been enhanced had he approached me in a somewhat different manner, and had he checked a few more facts. It is said that I was 'not cager to talk about the project.'' I should say that I was called at home some months ago, and never directly in-terviewed. Mr. Solomon asked me a series of questions about my IDA consultantship, but only toward the close of the discussion did he mention that the material might be included in a later Col-legian series. I think it is understandable that an essentially personal, otherwise unidentified call does not warrant an elaborate reply. does not warrant an elaborate reply.

Mr. Solomon never called again, nor did he look me up in person. I had asked him, once told of the possibility of a Collegian story, that I be allowed to check the accuracy of his telephone conversation impressions. This was not done. The result is that some of the spirit of the phone con-versation suffers from distortion, and several fac-tual errors appear - for instance, the study ir being sponsored by the International and Social Studies Division of IDA, nof by an "Economic and Political Studies" division.

I hope that, in the future, Collegian inter-viewing procedures will be undertaken with somewhat more altention to elementary courtesy and to the details of material being published.

> Dr. Theodore Slovin **Division of Counseling** "Portnoy's Complaint and The Jewish Student"

The lampyridae beetle family. Delight of small boys. Biological light bulb. And prime source of raw material for another Du Pont innovation.

Luciferase, an enzymatic protein with intriguing properties, obtainable only from fireflies. Luciferin, an organic molecule also found in fireflies, but synthesizable. Adenosine triphosphate (ATP), a common energy-yielding substance found in all living cells.

Those are the three main ingredients in lampyridae's love light. And because ATP is common to all living cells, university researchers discovered they could produce an artificial glow by mixing luciferin and luciferase wherever life is present.

Noting that phenomenon, Du Pont scientists and engineers went on to develop it into a practical analylical system. Correlating the intensity of the artificial ."glow" with the amount of ATP present in bacteria, they designed a means of measuring the reaction.

The result is the luminescence biometer-the first really basic improvement in bacteria-counting methods since the time of Louis Pasteur. Rather than waiting days for a culture to demonstrate growth density, a doctor or technician can

now get a digital readout of bacteria concentration in a matter of minutes.

Other potentially lifesaving uses for the biometer are being suggested every day-such as diagnosing metabolic rates, 'enzyme deficiencies and nerve damage.

Innovation-applying the known to discover the unknown, inventing new materials and putting them to work, using research and engineering to create the ideas and products of the future-this is the venture Du Pont people are engaged in."

You can become one of them, and advance professionally in your' chosen field. See your Du Pont' Recruiter. Or send us the coupon.

# Most of ORL Work in Submarine Warfare

#### (Continued from page one)

(Continued from page one) determines its own programs. But we do make it our business to know what is of importance to the Navy, " The Navy, however, tells a different story. A spokesman in the Department of Defense said that the ORL's research tasks "are assign-ed by the Navy and become part of the work statement of the contract," The contract, negotiated between University officials and the contracting officer of the Navy, also includes terms of management and operation of the Naval facility by the University. Funded ST0 Million

#### Funded \$70 Million

Funded \$70 Million ORL officials estimate that in its quarter-century of existence, the Laboratory has been funded about \$70 million for research All ex-penses, including the scientists' salaries, are provided by the University, which is in turn reimbursed by the Department of Defense. As with all research sponsors, the Pentagon pays a 58.6 per cent overhead charge for the use of University facilities and personnel, expenses which, in fact, would in many cases arise even without direct use.

"But the purpose." John C Johnson, the ORL director says, "is not to bring in money, but rather knowledge."

Johnson is a sociable man whose creeping hints of middle age have not vet hidden the probable frame of a football player a generation removed. His office in the Main generation removed. His office in the Main Laboratory, spacious and modern, befits a man of ten years' tenure. A floor below, conspicuous by their uniforms and Dick Tracy demeanor, is a flock of security guards. "We have never turn." anybody away in the ten years I have been here," Johnson says almost apologetically of the guards, "Anyone can come in and get a tour." On Johnson's desk is a block and white

can come in and get a tour. On Johnson's desk is a black-and-white paper sign which outlines for a visitor the three "major goals" of the ORL. The last one, after the pursuit of new knowledge and the op-portunity for graduate education, reads: Make Significant and Continuing Contributions to the National Welfage.

National Welfare. Perhaps this refers to the Laboratory's work on the Mark 48 torpedo and numerous other aspects of undersea warfare. For despite suggestions by two secretaries of defense and other Pentagon officials that national defense labs adapt their capabilities increasingly to socially oriented civilian projects, the ORL has not moved significantly in this direction. In-deed, work out of the defense field is almost nonexistent.

nonexistent. "The social problems facing this country are very difficult." Johnson said. "I don't know how we can tackle them." After a moment's pause, he said. "We need someone to frame the problems in engineering terms. The problems need to be spelled out in technological terms." Johnson is a member of the Committee on Federal Laboratories. a group under the Federal Council for Science and Technology, which is chaired by President Richard Nixon's science adviser, Dr. Lee A. DuBrudge. The committee, according to Johnson, works across the board into all departments of government to redirect a portion of defense labs' work into social problems. social problems

#### Madison Ave. Mirage

So if Johnson, who is personally involved in rechanneling the labs' work, shrugs his shoulders at the problem, the Pentagon's ex-pressed concern for social problems may in fact be a Madison Avenue mirage.

What is certainly no mirage is the ORL's involvement in weapons research. The latest development, the Mark 48 torpedo, is the first complete torpedo weapon system to evolve from the Research Torpedo Configuration II (RETORC) program, of which the ORL was put in charge in 1957. RETORC II includes the development of all torpedoes which can be launched from the torpedo tubes of ships. At the moment, the ORL's involvement

At the moment, the ORL's involvement with the Mark 48 is advisory. The torpedo is now in the manufacturing stage, and according to Johnson, the Laboratory was asked by the Pentagon a year and a half ago to act as con-sultant to Westinghouse, the industrial con-tractor for the torpedo.

"The defense contractor (Westinghouse) does not have a deep understanding of the

torpedo," Johnson said. "We are able to help because we have the technological back-ground." He added that the ORL's "main function" now with the Mark 48 is research. Sitting on the board of directors of West-house, incidentally, is University President

inghouse, incide Eric A. Walker. Despite the ORL's almost exclusive work in undersea warfare, Johnson claims that the Laboratory's discoveries have no applications to the Vietnam war or any aggressive actions.

to the Vietnam war or any aggressive actions. "The research conducted here has only defensive uses." Johnson says. "It is used against subs which try to sink our ships—its only purpose is to defend our ships. Also, to keep enemy subs from penetrating our defenses and releasing a missile, or if already released, from releasing a second one." Johnson, however, could not say whether he would regard the Mark 48 as offensive or defensive if he were on the receiving end. He admitted, in fact, that the whole idea of trying to delineate between offensive and defensive weapons in the nuclear age is rather futile. Putting aside considerations of offensive and defensive weapons, just the fact that the ORL is involved in University-sanctioned arms research pumps adrenalin into the passions of

And defensive weapons, just the fact that the ORL is involved in University-sanctioned arms research pumps adrenalin into the passions of many. The most radical viewers look on the ORL-Pentagon relationship as a con-spiracy—the generals using their radar to detect new wars to fight and the university scientists conniving for a share of the research and financial spoils. Not a Conspiracy. While only the most naive would deny the existence of some community of interest be-tween a scholar and his sponsor, the military establishment—which includes the ORL—is more closely what John Kenneth Galbraith calls 'an organization or a complex of organizations and not a conspiracy."

The ORL scientists would welcome an end to the conflict in Southeast Asia if only because to the conflict in Southeast Asia if only because it would release more funds for research. So in that sense they have a vested interest in the course of our foreign policy. One could only wonder, however, what the attitude would be if the ORL had a vested interest in the con-tinuation of the war, as do numerous defense laboratories and private research "think tanks." tanks

"We don't like wars, we're not militarists," Maurice Sevik, associate professor of acrospace engineering and ORL scientist said. "Nobody in this lab wants war anywhere or anytime. We don't want undue influence of the

anytime. We don't want undue influence of the military in our lives. "But." he emphasized, "that cannot best be achieved by destroying our means for defense." Laced through such an argument, which is typical of the defense-engaged scientist, is a blend of scientism and patriotism: the scientist sees himself as an indispensible contributor to the nation's defense, while at the same time pruning the limbs of scientific ignorance. "There are two reasons why we cannot

"There are two reasons why we cannot turn our back on research for the Department of Defense," Sevik said. "First, we have an of Defense," Sevik said. "First, We have an obligation to the academic community. That includes carrying out research, teaching courses, and doing theses work. We have a knowledge of physics, for example, that is not known in other places. The technology required for projects is found in places of higher learn-

for projects is found in the individuals feel that "And secondly, some individuals feel that our society, despite all its faults, is one we like and want to preserve. We have an obligation to the Navy. This has nothing to do with im-mediate wars. It is more long-term. The coun-try must be defended." Hazardous Art

#### Hazardous Art

The ORL's involvement in the engineering The ORL's involvement in the engineering or "hard" sciences naturally means that much of its work is classified, an unavoidable fact that has fostered festering relationships bet-ween students and administration on many of the nation's campuses. At the ORL, estimating the percentage of classified research is ap-parently a hazardous art, with guesses from top officials going anywhere between five and 40 per cent.

40 per cent. The hangup seems to be that much of the classified results are produced in unclassified projects and are either hard to predict, or to

ehc

in a

presents

measure. The classified material usually per-tains to an engineering application or weapon description. "For instance," said Sevik, "we may have

"For instance, said Sevia, we may have a call from Washington asking for help. They might ask us to test a propeller in the Water Tunnel. This is classified because it pertains to a specific piece of hardware. Classified material is the application. We can't reveal figures and statistics that have to deal with the part's specific applications." part's specific applications."

part's specific applications." Work that is not classified at the ORL is proprietary; the Navy has the exclusive right of manufacture and publication of research findings. The difference between classified and proprietary work is essentially that the former is regarded as vital to national security and the latter simply reflects the rights of a sponsoring agency. agency.

While proprietary matter is automatically downgraded until it is completely unclassified, it involves research behind locked doors. And like classification, it means a restraint on publication, which is viewed by many observers as a compromise on the free-inquiry concept of the American university. the American university.

University Senate has grappled with the classification controversy, and in May pass-ed a resolution proposed by the Senate Com-mittee on Research and Graduate Study which crystallized their view joint on the matter: "Be it resolved that, the University should be it resolved that, the University should review supported research contracts and act to minimize all restrictions on publication in order to insure the freest possible dissemination of knowledge, and to maximize the opportunity for any scholar to carry on effective investigation in his chosen field of inquiry." What has been the effect of the resolution?

What has been the effect of the resolution? At the ORL, where scientists do undersea war-fare research, apparently very little.

tare research, apparently very little. "We can release no more information," says Johnson. "We can encourage people to publish more. And we can push for the nccessary freedom to disperse what we believe should be dispersed without prior approval of the Navy." Johnson, whose salary is largely supported by the Navy, is not likely to push too hard. Nor is it likely that he could be recruited as a loc-bying force to effect total freedom of publication on campus. Eliminate Access

#### Eliminate Access

Johnson believes that the policy of ac-cepting only unclassified research con-tracts—as adopted by a number of prominent universities in the wake of student protests—is "like cutting off your nose to spite your face." He is quite firm. "To eliminate secret research from campus," he said. "would eliminate ac-cess to a lot of information which could help in the conduct of research.

the conduct of research." Classified research is indeed vital to many engineering disciplines, and University-wide abstention would almost cortainly mean an end to undersea warfare research at the ORL, ex-cept that of the most basic nature. Besides, Johnson argues, even with substantial classification, the Laboratory has provided partial sponsorship—materials, equip-

ment, and partial salaries—for all advanced degrees earned for work there. (See Chart). Although the ORL's contribution to the graduate program is substantial, in rongh terms of cost-per-degree it is considerably more inflationary than flattering. With a S9.6 million research budget and 18 advanced degrees awarded in 1967-1968, the average degrees theoretically concurred 574 444 (Bisdegrees awarded in 1967-1968, the average degree theoretically consumed \$534,444. This compares to \$2,431 per degree in the College of Education's research program, which sup-ported 318 degrees on \$773.000, or even to \$235 per degree in the College of Arts and Architec-ture. A listing by college follows: 18 degrees are counted twice—in the entries for the ORL and the College of Engineering—since they had dual sponsors.

Also contributing to education in general at the University are the joint appointments held by scientists in the ORL. About 30 to 40 of them, according to Elbert F. Osborn, vice president for research, both work in the Laboratory and teach in the College of Engineering.

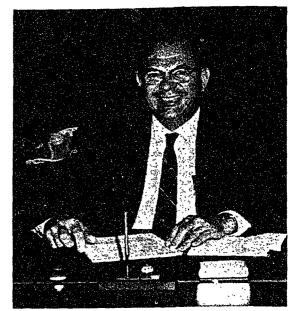

Engineering. "The ORL is one of the few national labs in "The ORL is one of the few national labs in the country that has cooperation between the lab and the college of engineering." Osborn says, "In fact, Penn State is, I would say, the leader in cooperative research in engineering with a national lab. The taxpayers' money is really getting double use." (Actually, the tax-payers' money is getting double use only with those 30.40 scientists, because there are ap-proximately another 550 staff members who are on the University payroll and remain in the ORL doing research for the Navy.) This, says Johnson, is why he took over the

This, says Johnson, is why he took over the ORL's reins a decade ago. "At Penn State we have a unique situation in the country," Johnson says. "That's why I came here in 1959 from Michigan. The research is connected with the University community and not set off away from everything else."

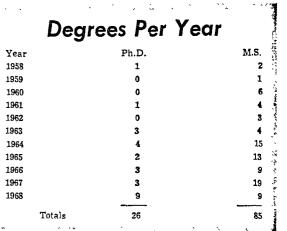

#### Working Relationship

Working Kelationship "The ORL has a good working relationship with the University," he continued. "It attracts professors and men competent in their fields for research, and they form a pool to serve as part-time instructors in the University." These men do not feel the moral claustrophobia of the graduate students work-ing at the ORL, who are caught pants down by their own generation, which wants pothing of

their own generation, which wants nothing of war and its weapons. Although the grads, like the scientists, may decline weapons research

## **ORL Says Work Not Applied to Asian War**

(Continued from page four) maintained its webbed foot in the graduate pro-form for years. Since 1958, the ORL has pro-for more basic work, even that finds its ultimate application in a more efficient and better armed Navy. John Thompsen is a tall, mustachiced grads fresearch project--to measure water and wind forces acting on a cylinder-has potentially both military and civilian uses. And because of this, he is concerned and troubled, playing a are of conscience that has no rules. Thompsen is at first assertive. "I really military chooses to use information I obtain." Then, he becomes more reflective. "I'm not although I believe all the money will come from the Department of the Navy. So I know if more on the Navy see applications from my work, they I take it. "But there are two things about my finteresting work, regardless of the application, And as to the possible application, I would pre-

fer pcaceful, but I know there may be military."

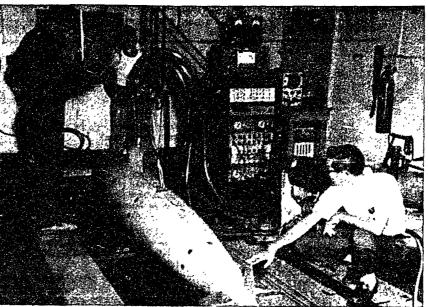

Thompsen takes his time before answering, rotating in his chair and staring at the wall in thought. Finally, he sighed and said, "I would rather not have military-funded research on campus."

And so it gees—some very confused, some very committed, and all grasping in the defense rescarch debate for a moral or patriotic rationale. The battle lines are drawn, and there is such a vast middle ground between the two sides that they inevitably play the nuclear war game that each abhors, verbally attacking their faceless foe that is portrayed as either the Fascist warmonger or the Maoist ideologist. The confused inhabitants of the middle

The confused inhabitants of the middle ground, however, are likely to be the ones to determine the course of the University-Pentagon relationship. "We only want everybody to obtain all the facts and then make a judgment," said Sevic.

And the facts assembled, one man's judg-ment appears on Tuesday.

DEVELOPMENTS

intense dhism, for ways to develop spiritually. There's a great thirst on the part of the young for a more valid existence."

Cobb's books concern CODDS BOOKS CONCEPT religion, education and philosophy. His most famous works are on the subject of genius — "Discovering the Genius Within You" and "Im-portance of Creativeness." Cobb has authored some twen-

STOCKHOLM, Sweden (AP) - The 1969 Nobel Prize fo literature was awarded yesterday to Samuel Beckett, the Irish emigre playwright of the absurd, whose work was described as "a muffled minor key sounding liberation for the oppressed.''

Beckett, 63, has written both plays and novels. Two of his most widely known plays premiered in the United States: "Waiting for Godot" and "Endgame," in which two characters spoke their lines while sitting in trash cans.

Beckett has lived in Paris for more than three decades, and writes in both French and English.

The Swedish Academy said he was awarded the \$72,800 prize for "his writing which, in new form" of the novel and drama, acquired its elevation from the destitution of modern man.

Beckett is also noted for his fiction trilogy "Malloy," "Mallone Muert" and "Linnomable."

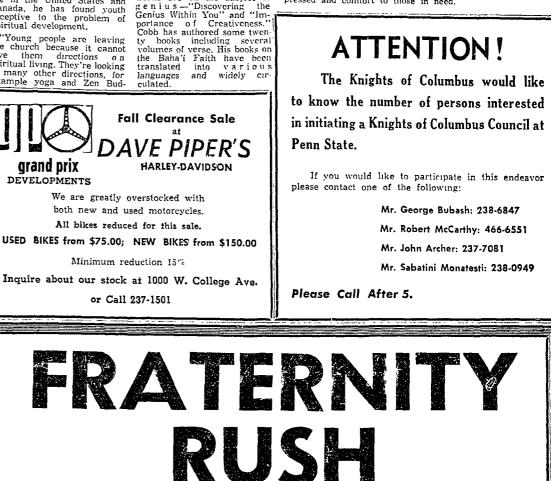

The Novel Prize for literature is the first to go to a French writer since existentialist philosopher-playwright Jean-Paul Sartre turned down the award for literature in 1964, say ing he wanted to remain free to bring together the cultures of communism and capitalism.

Communism and capitalism. The only other Irish-born writer ever to receive a Novel Prize was William Butler Yeats in 1923. James Joyce, another Irish emigre, never got the prize. Beckett was considered a long shot to win the prize this year but has been a strong contender for many years.

In Paris, Beckett's publisher reported that the author was vacationing in a floodbound Tunisian village and could not be

reached. "Part of the essence of Beckett's outlook," said the secretary of the Swedish Academy, Dr. Karl-Ragnar Gierow, "Is to be found in the difference between easily acquired pessimism that rests content with untroubled skepticism, and

pessimism that rests content with untroubled skepticism, and a pessimism that is dearly bought and which penetrates to mankinds utter destitution. "A combination of paradox and mystery, containing a love of mankind that grows in understanding as it plumbs farther into the depths of abhorrence, a courage of despair, a com-passion that has to reach the utmost of suffering to discover that there are no bounds of charity. "From that position, in the realms of annihilanon, the writing of Samuel Beckett rises like a miscrere from all mankind, its muffled minor key sounding liberation to the op-pressed and comfort to those in need."

The following houses will be open to all interested men (first term and up) from 2:00 to 5:00 p.m. on

## **Uncle Ben Days Gone** their way to avoid showing blacks in what might be con-strued as demeaning ocnever meant to appeal to the black cusomer: they simply served as attention-getting and

"Prior to 1963, the use of

strictly the stereotyped black, a comic inferior or a white

man's servant," Gibbs said.

Advertising Still Has Way To Go

The days of Aunt Jemima and Uncle Ben are over, but today's advertising world still cupations such as a janitor or elevator operator." has a long way to go in presenting blacks and whites as equals. blacks by advertisers was

Such are the conclusions of William E. Gibbs, instructor in journalism, as part of his master of arts degree program in journalism. Gibbs' master of arts degree program in journalism. Gibbs' investigation show that ad-vertising today has made Significant strides in portray-ing American blacks as or-dinary people—adults and children, mothers and fathers, bauseniums and wage carpers housewives and wage earners.

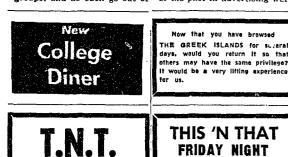

housewives and wage earners. "They have the same pro-blems and seek the same solutions as whites in today's magazine and television ads." Gibbs said. "They worry about bad breath, slipping dentures, laundry problems, their children's health and their own eventsive smaking." excessive smoking.

The problem now is that most advertisers fear their portrayal of blacks may look contrived.

"When first urged to include blacks in advertising, the advertisers objected because they said they did not know how realistically and believably this could be done," Gibbs said,

"Another problem is that ad-vertisers are aware of the sensitivities of Civil Rights groups, and as such go out of

FRIDAY-9:00 P.M.

The new portraval also showed that the black was the advertiser's customer, Gibbs maintains.

#### By DAM DONOVAN Assistant Sports Editor

When Ohio University comes to Beaver Stadium tomorrow at 1:30, don't be surprised if traffic control puts its helicopter in the air to regulate the flow of flying footballs. The Bobcats boast a high-flying offense that loves to go for the long bomb, according to Penn State assistant coach Jim Weaver.

"Ohio University has an explosive offense capable of scoring on any one play," Weaver, who has been scouting Ohio, said. "They throw the long bomb from a variety of formations at any time during the game. So far they've tried the long pass six or seven times a game."

#### **Great** Receiver

The target of most of these passes has been a player who Weaver said "is the finest split end in the country." Todd Snyder has put the Bobcats on the football map with his performances the last two years. In the Ohio performance against a Big Ten team. Minnesota, Snyder showed the Gophers that Mid-American Conference football isn't all bush. He caught 12 passes for 214 yards and three touchdowns. He was named Associated Press lineman of the week even though the Bobcats only got by with a tie. The 6-foot 170-pound senior has grabbed 37 passes for 437 yards and six touchdowns this season.

#### Bryant Hurt

The man who usually throws the ball to Snyder is All-American candidate Cleve Bryant, but the scrambling quarterback was sidelined late in the Bobcats 24-21 loss to Miami (Ohio) and is listed as a doubtful starter.

"We're not 100 per cent sure that Bryant won't play," Weaver said, "but we do know that Steve Skiver came out in the last four minutes of the game and completed six of eight passes for 106 yards, a touchdown and a twopoint conversion. We know he has a fine arm and a quick delivery, but we don't know if he has the quickness and running ability of Bryant.'

breakaway runner. He is also deadly on the ways this week," Paterno said. swing pass pattern.

Fullback Dave LeVeck is a runner who looks like he would have a hard time convincing the coach of State College high that he is big enough to play fullback. His 5-9, 180-pound frame is very deceptive, according to Weaver. "He's an effective three-yards-a-carry man." he said.

LeVeck is also a dangerous runner when he does get past the line. In fact, the fullback leads the team with a 4.8 yards per carry average.

The Penn State defensive line may have trouble adjusting to the varied defense Ohio employs. The Bobcats are known for having more defensive alignments than General Westmoreland knew existed.

#### Gambling Defense

"They use either a split six or a fourthree," said Weaver said, and the football experts reading this can figure out what that means, "They have a variation of pass coverage depending on the situation. They do a lot of gambling and dealing in their pass rush."

Overall, the book on the Ohio Bobcats is speed. Both offensively and defensively Ohio has myriads of players who can fly. This is significant if one remembers what Mike Reid said a few weeks ago.

He was talking about the effectiveness of the Penn State defensive alignment. "We can adjust to a lot of different things and it will be interesting to see what opposing teams come up with to try and beat us," said the Lion cocaptain. "But they're going to have to be a quick team if they're going to beat the Penn State system.'

Ohio just may be that small, quick team that could do what the big, strong Syracuse team almost did last week. Coach Joe Paterno is not underestimating his opponent. "I don't understand what everyone is saying about them being weak," the coach said. "Ohio has a good, solid team."

2

The Ohio Bobcats hope just the opposite, of course. And the team of speedsters may just the Lions.

#### Grid Contest **Entries Due**

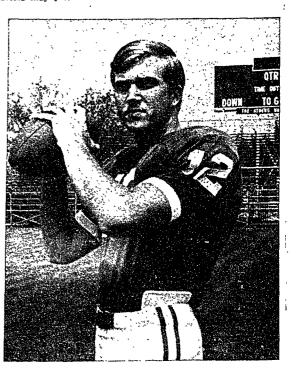

Once again all football experts on the Penn State campus have the chance to

experts on the Penn State campus have the chance to prove their gridiron knowl-edge in The Daily Collegian football contest. All wishing to enter must pick the wim-ners of the following 33 games and predict the scores of the games indicated. Entries are to be brought to the HUB desk by 4 p.m. tomorrow and must be ac-companied by a 25 cent en-try fee. The winner will re-ceive \$10 and anyone pre-dicting the correct outcome of all the games will receive a \$5 bonus. ## SportScene Will Web State (a. 1998) Standard an Acadhlichachtacht athradian diais an ar Wins Answer the Critics By DON McKEE

#### Collegian Sports Editor

America's favorite sport is not profootball or horse racing. It isn't chasing girls, drinking or drag racing, either. The sports fans' greatest avocation is second guessing — commonly called "Monday morning quarterbacking."

On the Penn State campus and in the national press,

this has grown to epidemic proportions The second and a lot of it is aimed squarely at one guy — quarter-back Chuck Burkhart. MCKEE

If there has been a more maligned player in college

football history, it's hard to remember him. People say nicer things about Leo Durocher than they do about Burkhart, the quiet senior who has led State for the last two seasons.

The unfavorable comments range from "Burkhart can't run, can't pass and can't lose," or "No team has won the national championship with a less than great quarterback," to things that would make Attila the Hun blush and lose his composure.

But through all the controversy, Burkhart continues to do his job, and - surprize, surprize - the Lions have won 16 times with him and haven't lost yet. None of the critics can figure that out, they just mumble into their beer and keep talking about quarterbacks who can throw the ball 60

yards standing on their heads, but who haven't won a game yet this year.

But whether the self-styled H. L. Mencken's know it or not, some people consider Burkhart a more than fair quarterback, among them his coach. Joe Paterno.

"If you have to have impressive statis-tics to be great," Paterno said, "Burkhart's never going to be great. But if you base his value on how many games he wins for you and will win for you, he's great.

"All I know is that as a quarterback in two years of high school his teams were 20-0. Last year we were 11-0. That's 31-0 and you can't beat that without cheating."

Burkhart, who has to be one of the most confident players in the country, is aware of the fan and press reaction to his play, but chooses to answer it with his performance

"I think that everything people have thought of me, they've based on the first game last year." Burkhart said. "Everyone was watching to see how Penn State's new quarterback would do. Okay, I started out pretty badly, but I had a few good games in a row, too. But the first game just stuck with me the rest of the season.'

After Burkhart brought the Lions back in the last two minutes to win the Orange Bowl, a lot of people let up on him. But anytime anything goes wrong, like being scared at Syracuse, the critics start up again.

"It bothers me to a certain point," Burkhart said. "When you're out there trying to do your best, it can get to you.

> "It would be different if I had come up and the the second second second

here and shot my mouth off, but all I've said is that I'd try to do my best."

So far, Burkhart's performance hasn't made anyone forget Johnny Unitas, but he has done the job. He's made the important third down completions and has completed 30 of 64 passes. Not spectacular perhaps, but not disastrous. Remember, Joe Namath didn't throw any touchdown passes in the Super Bowl, either. And, since State's of-4. 1.1 fense is geared

staff) telling BURKHART me to stick with it," Burkhart said. "The breaks will even out.

warm up.

"The coaches have stuck me in tight situations, too. That's helped build my confidence.

If there's an answer to the fans who boo after every incompleted pass, it's that winning streak Burkhart has put together. The saying goes that nothing succeeds like success. And people used to laugh at Ron Swoboda and Ed Kranepool. But then, some people are never satisfied.

## In Tossup Contest Harriers To Meet Hoyas

**33** Contests

By PENNY WEICHEL

Collegian Sports Columnist

In Charlie Rice's Punch Bowl of This Weck Magazine last Sunday, there was a Guessing Quiz in which I got none right which means my hunches aren't too good and I shouldn't play the horses. Although it didn't say anything about football prognost cating. I have an idea I shouldn't be stuck with this job, either.

At any rate, my razle-dazzle flea-flicker percentage for last Saturday was 72 (23.9-1) and overall it dropped a bit to 72.3 with a 94-36-2 showing.

break the 40 point barrier against Minnesota on the road. Even Ohio U. scored more points (35 to 34) in Memorial Stadium than the Buckeyes. Just goes to show you—but I don't know what

Air Force over Colorado State—in case you're in-terested, these predictions are written to Beaule records.

Arkansas over Wichita State-today Wichita, tomorrow the Penns Valley High School JV.

Army over Boston College—the better of two Eastern evils survives.

Alabama over Clemson—be sure to read Bear's new book "From the Presidential Nomination to the Dog Catcher Nomination of Tuscaloosa, Alabama in Four Years Made Easy."

Florida over Vanderbilt—Vandy's operating on all two cylinders again.  $\frac{1}{4}$ 

Florida State over Mississippi State--my roommate just dropped a whole box of Oxydol on the floor. Georgia over Kentucky-well, wait till basketball

Georgia over Rentucky-weak, and an and season. Dartmouth over Harvard-Crimson caught looking ahead last week, pays for it this week. Mississippi over Houston-Manning'll roll up more yards by himself than all the Cougars did against Tulsa last year. Michigan State over Iowa-Duffy's got the devil in his heart

Michigan State over Iowa—Duffy's got the devil in his heart. Kansas over Iowa State—Just on an implusive hunch. Kansas State over Oklahoma—Sooners get a taste of Poison Purple Country. LSU over Auburn—the time has come when a Grade A defense must be butchered. TCU over Miami (Fla.)—my bosom buddy Busty Un-derwood gets his kicks in this one. Michigan over Minnesota—Minne-ha-ha. Virginia over Mavy—who knows? Nebraska over Oklahoma State—Cornhuskers are just a sound choice. that's all. NC State over Duke—Blue Devil opponents no longer have to fiddle with Biddle. Ohio State over Illinois—fight, Illini, fight, fight, Washington over Oregon—this is another "who knows?"

Oregon State over Utah-The Great Pumpkin knows

Purdue over Northwestern-after a fortnight's fling

South Carolina over Maryland—Terps tangle with the people s choice in the ACC. SMU over Texas Tech—Tech looked good in Street and

Smith's. Stanford over UCLA—the Indians' last stand. Texas A and M over Baylor—some girl just came in and made me turn my Beattle record down. Notre Dame over Tulane—so I turned it down. USC over Georgia Tech—but not before I gave her a

sign of disapproval. California over Washington State—if Bears aren't too battered after the UCLA fiasco. West Virginia over Pitt—well, Panthers you really blew

It last week. Indiana over Wisconsin—watch the Hoosiers lose this one. They're another Iowa at heart.

## **Booters' Defense Faces Middie Scoring Threat**

By BOB DIXON Collegian Sports Writer

Things must be getting close to desperate. After all, seven years of futility is a long, long

time. Seven years. . that's how long it's been since the Penn State soccer team has scored even one goal against the Midshipmen of Navy, the Lions' opponent for tomorrow's home game at 11 a.m.

State is improved over last season when the Lions were beaten by Navy, 3-0, so maybe will try to even their record with their third the scoreless, if not the winless streak will be stopped. But it won't be easy. The Middles are strong once again. Rated sixth in the preseason rankings, they won their first three games this year before losing to Penn, the top Ivy team around, 2-0.

#### Strong Defense

The Lions are more likely to keep Navy from scoring than in hitting the goal themselves. They have scored only five goals in their five games thus far and it has been the defense which has helped to give State its two shutout wins to counter its three defeats. And besides that, most of the scoring power the Lions have been getting has been generated by freshmen, who will not be allowed to play in the Navy game Navy game.

State coach Herb Schmidt knows the trouble he's in for. "Navy has always been tough for us," the coach said. "The fact that we haven't been able to score against them in the last seven years proves that.

## Tough Again

"Navy is good again this year. They play a wide open game, they use their wings well and they like to run. They've lost six starters from last year, but they're still experienced in the important positions."

Tops among the returnees for the Middles row.

is senior captain Casey Bahr who was an All-American at center-halfback last year and who should be Navy's big playmaker.

Senior goalie Supko leads an experienced defense which includes two starting fullbacks from last year, senior Tamburcini and junior Conklin. Both of the inside lincmen, Flanagan and Fitchit, are also back to lead the Middle scoring attack.

#### No Sick List

For State, everyone is healthy, as the Lions win of the season, which is exactly three more than they got all last year when they finished at 0-6-3.

The improving Lion defense, which has given up just eight goals in the five games, will again be achored by junior goalie Leith Mace and he will be helped out by  $\operatorname{fullback}_S$  Phil Sears, Charlie Messner and Russ Phillips.

The halfbacks, the playmakers, will be Joe Griffin, Glenn Ditzler and Ray Carinci. The front line, whose job — opportunity — problem (you pick one) will be to score and break the seven year jinx, will be Brent Buddenhagen and Vince Gatto on the wings, with Jim Watts, Carl Decker and "Smitty" Smith fighting for the inside spots.

#### Will They Score?

The futility of not being able to do anything against a team for seven long years might be enough incentive for the State linemen to do some scoring. The current Lions haven't ex-perienced the frustration for more than three ears however, as even coach Schmidt is only in his second year.

But the record is clear and the Lion booters must be aware of it. It's going to take an im-proved offense to go with State's improving defense if any jinx is going to be broken tomor-

## **Rick Barry Sidelined Six Weeks; Undergoes Surgery Second Time**

WASHINGTON (AP) — but the 6-foot-7½, 217-pounder Rick Barry. star of the Washington Caps of American Basketball Association, will un-dergo surgery today to remove a cartilage in his left knee, the second time within a year he has had to have such an operation. Barry expects to be out of action for at least six weeks,

"I just hope I can play again. The doctors have told me that once I have the cartilage removed, and I exercised the leg and strengthen it, I

#### 'Action-Oriented Scholars'

# **NUC** Seeks Change

(Editor's Note: This is a special story to the Collegian on the New University Conference, written by John Atzinger for Journalism 392, a course in magazine journalism.)

The small, white candles carried by The small, white candles carried oy Vietnam Moratorium marchers had burn-ed their last hours ago, and the strains of "We Shall Overcome" had died. It was now the afternoon of the next day.

In his office in Burrowes, James Petras, assistant professor of political science and co-chairman of the New University Conference, reflected on what the previous day's demonstration had meant to the NUC.

"The Moratorium was an overwhelming success, exceeding our fondest desires," he said. Then, after a pause he went on to call the protest "the strongest opposition to federal policy in Penn-sylvania since the Whiskey Rebellion.

"It indicated that student apathy at Penn State is a myth," he said. "It showed that when issues are presented in an intelligent manner, large numbers of stu-dents will respond."

uents will respond." The New University Conference, born last February, is an organization of radical faculty and graduate students, but it is not simply a teachers' association, nor does it have much in common with trade unions. Donn Balley, instructor in speech and a charter mem-ber, calls NUC "a collection of ac-tion-oriented scholars." Wide Political Second

#### Wide Political Spectrum

Wide Political Spectrum NUC mem-bers vary from McCarthyite liberals to Marxian socialists, but they are in general agreement on their primary goals. They seek to bring about social change in America by working within the institution of the University.

"We are people concerned with pro-blems related to racism, imperialism, bureaucratic control over university life and other areas, corporate structure and government," Petras explained, "We favor radical change in the distribution within social and economic, as well as political institutions." NUC members generally feel that

pointical institutions." NUC members generally feel that professors doing research on social pro-blems should become involved in solving those problems. "Teachers have a ten-dency to investigate, examine an issue, then maybe sign a petition." said Baley. "They have an obligation to go beyond that."

"They have an obligation to go beyond that." Pamela Farley, graduate assistant in English and the original organizer of NUC at the University, explained: "NUC tries not to be just a talk group. We try to combine theory with action." The University chapter grew out of he wave of serious student activism that hit the campus after last year's ban on the underground paper, the Water Tun-nel, and the arrests of its editor and three other students by State College police on obscenity charges Shortly af-terward, the red armband movement developed, and culminated in a seven-hour sit-in fold Main over nine demands of the Steering Committee to Reform the University. In response, President Eric A. Walker announced the formation of a Special Judiciary Board to hear the cases

A. Walker announced the formation of a Special Judiciary Board to hear the cases of six students accused of "disrupting the University" by the sit-in. With tensions running high on cam-pus, faculty groups began meeting in an attempt to come to grips with the situation. But to Miss Farley, these meet-ings seemed to be leading nowhere, turn-

ing into mere, "forums for discussion." "I saw a need for faculty as well as students to become actively involved,"

students to become actively involved," she said. She contacted several similarly con-cerned faculty members, and the docision was made to form an NUC chapter. Dur-ing the next several weeks NUC mem-bers helped defend students before the Judiciary Board and raised money to help pay the expenses of the students in the Water Tunnel obscenity trial. In late May, a demonstration was held in front of Old Main to protest the killing of a bystander to a People's Park action in Berkeley, Cal. The American flag in front of Old Main was lowered during the University demonstration and, as the result, a graduate student was aras the result, a graduate student was ar-rested. NUC issued a statement charging that the arrest had been instigated by the University and that it was the only response Old Main could give to the Californian's death.

#### One of 60 Chapters

Californian's death. One of 60 Chapters The Penn State chapter is one of nearly 60 NUC groups at colleges and universities around the country. All are largely autonomous and develop their own programs around local issues. Nationally. NUC was formed after a conference in March of 1968. The organization held its first convention in lowa City last June when it clarified its politics, adopting a constitution which states in the preamble that NUC will struggle "to replace an educational and social system that is an instrument of class, sexual and racial oppression with one that belongs to the people." One of the significant developments of the Iowa City meeting came in the area of women's liberation. Equal representation for women on the ex-ecutive committee was achieved by reserving seven of the 14 seats to women members. Women are also equally represented on the national committee. According to Miss Farley, the Penn State NUC "has as yet to demonstrate publicly its support for w om en's liberation." She said it is the woman's job to educate men about male supremacy

just as blacks have educated whites about racism.

At present NUC is developing programs to fight racism, repression and the Vietnam War. In attacking racism, it is considering raising the demand for "open admissions" in approximate the demand for violatil view of the inverted values of the second view of the university to all high school graduates who apply, regardless of grades and scores on college entrance tests. NUC sees these tests as culturally biased toward middle class standards. NUC is currently leading the fight against the proposed faculty club. "We see the faculty club as a manifestation of racism." said Morris Shepard, assistant professor of human development and the other current NUC co-chairman. "It is an example of the inverted values of this university." NUC members are urging their faculty colleagues to use the recent Administration questionaire to express their dissatisfaction with University policy.

policy.

#### Faculty Club Issue

"The questionnaire did not ask facul-ty members whether they wanted to have the club built, but only whether they wanted to join and how many meals they would eat there." explained Miss Farley. "It avoided the whole basic issue—that of priorities within the university. We want to raise this issue."

About three weeks ago, with Students About three weeks ago, with Students for a Democratic Society and the Black Student Union, NUC held a teach-in on repression. Describing repression as a serious but deceptive problem. Bailey said it is used by the Administration "to take an apparent leader of a group and isolate him. He doesn't have to be the group's actual leader." he continued. "The University then holds him up as an example and says 'see this is what

an example and says 'see, this is what will happer, to people who step out of line.

Will happer, to people who step out of line." NUC members report several instances of harassment with professors being challenged and warned that speak-ing out and becoming politically active do not contribute to job security... At the repression teach-in the three groups issued a Manifesto on Repression which stated that members of NUC, BSU and SDS have been harassed as in-dividuals by court injunctions and special judiciary board hearings during the past year, but that "this will no longer be possible in the future; any such repressive actions leveled against our members or others with similar goals will be interpreted as a move against our combined total membership. We intend to fight repression by any means necessary."

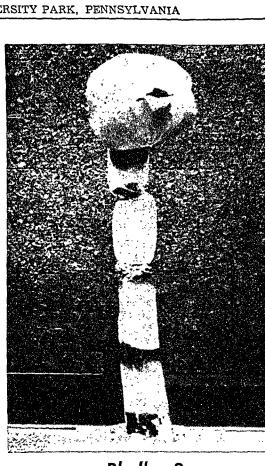

fight repression by any means necessary." The NUC is currently supporting the effort of William Semple, assistant pro-fessor of architecture and member of NUC, to obtain an explanation of why be was fired last June. In the past Semple frequently spoke out against the Vietnam War and racism at the University. Since he is an untenured pro-fessor, the University was not required to specify why he was fired, and it did not do so. Although NUC is involved in social action on many fronts, the issue to which members have recently devoted much ef-fort is the Vietnam war. In organizing support for the Moratorium, NUC con-tacted hundreds of other faculty mem-bers and urged them to cancel classes. On Moratorium Day, members spoke at the teach-in in the HUB and also set up a leaflet criticizing American foreign policy from a radical, anti-imperialist perspec-tive. tive.

#### NUC Criticizes War

NUC Criticizes War NUC does not view the Vietnam War as an isolated incident or as a mistake in policy. As Petras puts it, the war is a result of "the interventionist, ex-pansionist philosophy which underlies U.S. foreign policy, and which we define as imperialism." Within NUC, immediate withdrawal of all U.S. troops is seen as the only way to achieve peace. "That country belongs to the Vietnamese," said Shepard. "We have no right being there.' Since its inception, the University NUC chapter has more than tripled in size. About 50 faculty members are now active in the organization. Shepard in-dicated about 150 more are interested and are currently on the NUC mailing list.

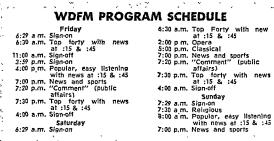

list.

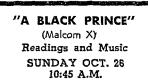

list. In Miss Farley's view, NUC's chief problem is the mobilization of people to pressure for change. "Students here are very little con-cerned with the social and political climate in which they live," she said. She said NUC must attempt to "educate both students and faculty and elevate their level of consciousness," because, she said, "when people become aware, they move."

## Walker Addresses **Engineering Forum**

Eric A. Walker, president of the National Academy of Engineering, told his colleagues today they must assume a major responsibility for improving the quality of urban life in this country. "While it is a mistake to say that the engineer alone can solve all the problems of the citics, the engineer can play a significant role in arriving at many of the solutions," said Walker.

Walker. Walker's remarks were prepared for an address to the Academy-sponsored symposium on The Engineer and the City which was expected to attract some 800 engineers, city plan-ners, government officials and architects from across the countr

ners, government onerais and arcmeets from across the country. Walker pointed out that some of the ills of the cities, par-ticularly in the economic, social or political sphere, simply were not ammenable to engineering solutions. An engineer, for example, could propose a system to alleviate urban transportation problems, he said, but after the system was devised, there would remain a fundamental question to be answered. "That is the question: Should we go ahead and do it? This question involves several things. It involved the availability of money. It involved the priority of doing one thing instead of another. It involved the question of public support for the decision," he observed. While Walker acknowledged it would not be easy to sur-mount the communication barriers among these diverse ele-ments of American society, he said that unless the gap is bridged the problems cannot be readily resolved.
